CABINET ACCEPTS FINANCE PLAN

FRENCH SOLONS
ASKED TO O. K.

FORCE IS LAST RESORT

Government Will Check Up Ability
of Contributor by In-
come Tax Reports

Paris.—The government's new financial bill, embodying the provisions for the proposed capital levy, or forced loan was introduced in the chamber of deputies Tuesday afternoon by Finance Minister DeMonzie.

The measure was agreed to by the cabinet Tuesday morning. He asked its immediate reference to the finance committee and a report on it before the end of the day.

The mechanism of the system as explained by the finance minister after adjournment of the cabinet meeting is intended to afford property owners and capitalists of France a chance to come forward and contribute proportionately to their wealth to the renovation of French finances.

It contains provisions obligating them to do so if they refrain from voluntary subscription.

MAY USE FORCE

"It is a plebiscite on the question of free voluntary contribution, each according to his means or constraint," was the way M. DeMonzie put it. "If the French capitalists understand the system and patriotically respond to the call of the government it will work without the slightest annoyance or interference in private affairs. On the contrary, if they make constraint, necessarily force will be resorted to."

Declarations for the income tax will be taken as a basis for obligatory subscriptions to the forced loan in cases where the capitalists fail to come forward voluntarily. Subsequently these declarations will be verified if there are reasons to suspect their exactitude.

OFFERED 3 PER CENT

Contributions to the forced loan may be spread over a period of five years and the contributors will receive a 3 per cent perpetual rent.

The Bank of France it was said in official circles, has already exceeded the legal limit of its circulation by more than 1,500,000,000 francs, so that it became imperative to regularize the situation by increasing this limit by the law for regularizing the financial position of the country which the government proposed to parliament.

SHOWS INCREASE

The weekly statement of the Bank of France last Thursday showed a circulation of 96,000,000 francs under a limit of 91,000,000 francs, but the Portefeuille (bills and acceptances) showed a sudden increase of over a billion, and it is declared this, with other accounts, were used to mask the situation.

Exactly what are the bank's advances to the state is not said. There were given last week as 100,000,000 francs under a limit of 22,000,000 francs by four billion francs. The situation has given governor Robineau of the Bank of France and the bank regents the gravest concern. Although there is no official statement on the subject, the continental edition of the Daily Mail of London said Tuesday that M. Robineau and the regents have informed the government that they will refuse to sign this week's statement unless the truth is told to the country.

MAY DECIDE TUESDAY
IF DOROTHY IS SANE

San Francisco.—The court proceedings which have been marked by many dramatic high lights to determine whether Dorothy Ellingson, 17-year-old matricide is sane or insane were expected to enter their final phase Tuesday.

The prosecution was prepared to introduce the testimony of three expert witnesses, notably Dr. Lloyd Bryan, an X-ray specialist, who it was believed would testify that the series of X-ray plates of the girl introduced by the defense disclosed nothing abnormal. These attending the young girl once at the county jail said the girl persisted in following her determination of taking the witness stand in an endeavor to convince the jury she is sane.

Launch Giant Carrier
Of Deadly Air Craft

Camden, N. J.—The giant airplane carrier Saratoga was launched late Tuesday at the yards of the New York Shipbuilding corporation. Mrs. Curtis D. Wilbur, wife of the secretary of the navy, acting as sponsor as the christening ceremonies with high officials of the navy and other government departments witnessing the event.

A sister ship, the U. S. S. Lexington, is to be launched this fall at Quincy, Mass. Originally these two vessels were to have been battle cruisers, but under the arms limitation treaty they were converted into airplane carriers before their construction was far advanced. When completed and commissioned late in 1925 the Saratoga will be the largest and fastest craft of its kind in the world. It will be the longest naval vessel of any design in the world.

The Saratoga is 875 feet long with a beam of 105 feet. She will have a speed of 33 knots an hour. She is driven by huge electric motors, the power being generated by turbines operated by steam from 16 oil fired boilers. She carries 5-inch rifles, the limit of size for ships of her type under the treaty, and weighs more than 33,000 tons. The power plant of the new Naval giant would be capable of supplying the electrical needs of a city of early 1,000,000 inhabitants.

Speaking at the launching of the aircraft carrier Saratoga here Tuesday, Secretary Wilbur declared that the ship "is not only a concrete evidence of the effect of the agreement limiting naval armament, but is also concrete evidence of the fact that at the Washington conference the question of aircraft was under consideration and that one of the methods adopted for limiting the effect of aircraft in trans-oceanic warfare was by limiting the size and number of air craft carriers."

"The mortal mind," he declared, "has conceived and put into execution nothing which embodies more of the accumulation of human knowledge than the vessel being launched today."

FIND BODY IN FOX
RIVER AT OSHKOSHIs Believed To Be Corpse of
North Milwaukee Man Who
Disappeared in January

Oshkosh.—The body of a man, badly bloated and, somewhat decomposed, was found floating in the Fox river near the traction Company yards here late Monday afternoon. Checks and other papers on his person gave the name of Henry Gless, 277 Western-ave, North Milwaukee.

Chief of Police Gabbert got in touch with the chief at North Milwaukee and was informed that Henry Gless had been missing since Jan. 25 and that he was reported to have left Milwaukee by automobile with a woman on a fishing trip.

The Milwaukee police planned to come here Wednesday to establish identification. The body was found man weighing about 150 pounds about five feet, ten inches tall and aged about 35 or 40 years. In his pockets was cash to the amount of \$21, a gold watch and chain and an unopened check for \$17.50 with the name "Wisconsin Bridge and Iron Company" printed on it. Alimony receipts were also among the effects, indicating he had been divorced.

CHICAGO VOTES ON
TRACTION PROJECTReferendum to Decide Huge
Surface, Elevated and Sub-
way Railway Program

Chicago.—Chicago voted Tuesday on municipal acquisition and extension of the surface and elevated railways and construction of subway, a \$700,000,000 project. A 40-year period is provided for payment for the properties out of the earnings of the lines.

For the street railways \$162,543,884 would be paid, for the elevated \$55,000,000 and for 485 miles of extensions to these systems \$262,500,000 would be appropriated.

A start on construction of a proposed 65 miles of subways would be made with the approximately \$20,000,000 already available from the city's share of street railway earnings.

Two propositions were submitted Tuesday, one to acquire the lines, and the other to create a municipal board of control to operate them.

The election ended a hard non-partisan fight of several weeks during which scores of meetings nightly heard proponents and opponents of the venture.

Green Bay.—The University of Wisconsin must expand in every way—in buildings, equipment and faculty, in order to rid the scholastic system from rote instruction to afford individual treatment to students, and to continue research work which will provide a background for such treatment, Professor Max Mason, department of mathematical physics, stated at a banquet of the Wisconsin alumni here Monday night.

Into a picture of overcrowded buildings, obsolete equipment, and overworked professors, Prof. Mason introduced one cheerful note.

"Everything isn't dark down there," he said. "I hope you discount the sensational news reports of undergraduate activities. As a matter of fact, the undergraduate of today at the University of Wisconsin is so much better than he was when I was a student, that I look upon him only with a profound admiration. There is a fund of courage, stamina, intelligence and loyalty in the undergraduate body that can't be exhausted."

31 COPS IN OHIO PLEAD
GUILTY TO BOOZE GRAFT

Cincinnati.—Thirty-one former Cincinnati policemen and rural dry agents entered pleas of guilty to federal grand jury liquor graft indictment charges in United States district court Tuesday. Six of the indicted men had pleaded guilty Saturday. Trials of the 65 former enforcement officers who had not changed their original pleas of not guilty were to begin Tuesday, but immediately upon convening court, Judge Hickman announced a number of the defendants desired to enter guilty pleas.

cate Doing Million Dollar
Nationwide Business

Chicago.—Evidence of a liquor and vice syndicate which the police said has been doing a business of millions of dollars a year was found here Monday in a raid on its headquarters where eight men, alleged to be minor heads of the organization were arrested.

Records of wealthy liquor customers, names of bribed prohibition enforcement officers, accounts of beer deliveries and details of the channels whereby liquor was brought from rum fleets off New York, Miami and New Orleans were confiscated. The raiders said they found an accounting system as efficient as that of a big business concern.

Several thousand dollars in checks of saloon men and druggists including one for \$15,000 from a north side drug store were seized. Among the papers was a telephone toll bill of \$278 for calls to New York, Miami and New Orleans.

OFFERS BRIBE

John Patton, former mayor of Burnham, a suburb, one of those arrested was charged by Sergeant Edward Birmingham of the raiders, with having offered him \$5,000 "to forget the hookkeeping system." The others arrested, the police said, were underworld characters several with police records.

The office suite had a doctor's name on the door and the first room entered was fitted up like a physician's reception room.

In the scrupulously itemized account books and loose leaf ledgers detectives, said were listed names of more than 500 well known Chicagoans, customers of ale, beer and liquor here and in outlying towns, details of the management of four large Chicago breweries, accounts of deliveries of carloads of beer and liquor and the cost system used in disorderly houses.

Search was made after the raid for the alleged heads of the syndicate whose names the police said were revealed through the records. They were said to be men well known in underworld circles and frequently questioned by the police in connection with liquor running and vice operations.

WORLD NOTORIOUS CROOK
IS CAPTURED AT VIENNA

By Associated Press.

Vienna.—A prompt reply from the chief of police of San Diego, Calif., with a photographic enclosure to a message from the head of the Austrian criminal investigation bureau has enabled the Vienna police to apprehend "Chester Smith" who is described by the police as one of the smartest and most successful international crooks of recent years.

The police allege that Smith, posing as the "Duke of Braganza" has been operating all over Europe. When confronted with the photograph from San Diego, according to authorities, Smith admitted that he was caught and threw up his hands immediately.

Radio May Keep World
Informed On Progress
Of U. S. Arctic Flight

BY DAVID LAWRENCE

Copyright 1925 by Post Pub. Co., Washington, D. C.—On Monday, the sixteenth anniversary of the discovery of the north pole by Admiral Peary, the doors of the federal prison are being thrown open to receive as an oil swindler, Dr. Frederick A. Cook, whose claims to a prior discovery started the world and then ended in his exposure as a scientific fraud.

The National Geographic society placed a wreath on the grave of Admiral Peary and the United States navy conducted a service in memory of the great explorer.

Coincident with this, officers of the bureau of aeronautics were in conference in the navy department to develop plans for the announced expedition of Donald B. MacMillan who is to make a raid on the Arctic areas to find and perhaps claim for the United States some of the very land discovered by Peary and unexplored ever since.

President Coolidge and Secretary Wilbur of the navy department were persuaded to furnish naval planes and aviators for the expedition. Lieutenant Commander R. E. Byrd who helped prepare the navy's flight across the Atlantic is to be second in command to MacMillan and in charge of the planes. There was talk of a dash for the pole but it is understood that the MacMillan expedition wished

simply to explore. The planes have cruising radius of 1,000 miles and could easily fly to the pole if that was deemed desirable. All effort will be concentrated on a work of exploration during the months of June, July and August, while the temperatures are favorable.

Meanwhile on the other side of the world Ronald Amundsen, discoverer of the south pole, is busily engaged in fitting out planes for an expedition from the northern coast of Norway to Spitzbergen and then the north pole. This effort, however, is more of a stunt than a scientific expedition but it will demonstrate, if successful, that what Peary took years and many attempts to do with dog sleds under the most adverse conditions in winter time now may be attempted with relative ease by airplanes in summer.

Should the Amundsen flight be successful, it will be the forerunner of other expeditions during the summer months in years to come. Eventually it is expected that airplanes will go from the eastern to the western hemisphere on the shortest possible route, flying from points north to Norway through the Arctic areas to Alaska and back.

Although the United States navy is to furnish the men and the planes for the MacMillan expedition, it is destined as a private affair. The National Geographic Society is helping to finance it, and one of Mr. MacMillan's associates is Eugene F. McDonald, Jr., president of the Zenith Radio company of Chicago. It is expected that radio stunts of a novel character will be developed by the expedition, possibly a voice from the Arctic being carried down the coast to American stations.

Mr. McDonald said today he hoped to make radio history on this journey. He is trying, for example, to get code messages through from the Arctic and in itself will be an achievement in a region where 24 hours of daylight is the greatest obstacle to long range transmission.

LEGISLATORS ACCEPT
PAY FOR ONE JOB ONLY

By Associated Press.

Madison.—Legislators who hold other state offices have voluntarily accepted only one salary, records in the office of Secretary of State Fred Zimmerman revealed Tuesday.

Herman W. Sachtlein, speaker of the assembly, has acted as state prohibition commissioner without pay since resigning the office of dry chief at the opening of the legislative session. There have been unconfirmed reports that he probably would be reappointed prohibition commissioner after the session, no successor having been named thus far.

State Senator A. E. Garey returned his pay as senator to the state treasurer, deducting it from his salary as secretary of the civil service commission, the records show.

FELON ATTORNEY TELLS
OF BANK TRANSACTIONS

By Associated Press.

Milwaukee.—Walter Burke, Kenosha attorney, who is serving a sentence in Leavenworth prison in connection with violation of the prohibition act was the chief witness Tuesday in the trial of William C. Hood, former president of the American National bank of Racine, charged with violation of the national banking laws.

Burke was brought here to tell what he knew in connection with the Union Food Stores company's transactions with the defunct banking institution.

Burke testified that he told Hood several times that the Union Food Stores company was about to fail, and warned the banker that his bank would be deeply involved if he did not take measures to protect it.

\$200,000 GARAGE FIRE
SET BY CHAPMAN'S PALS

By Associated Press.

Stoughtonville, O.—The Stanton Motor Co. garage fire here early Tuesday morning, which resulted in the complete destruction of the building and 26 automobiles, with an estimated loss of \$200,000, was started by former associates of Gerald Chapman, noted Ohio bandit, is the belief of city authorities who are investigating.

The garage is owned by William Snyder and Miss Katherine Bourne, 59 who were state witnesses against Chapman at his recent trial in Hartford, Conn. It is believed that associates of Chapman fired the garage as an act of revenge for the testimony of the local couple at the trial.

RULING SAVES
OVER \$100,000
FOR APPLETONAppleton Banks Unable to Re-
cover Stock Taxes Paid
Under Protest

SUPREME COURT DIVIDED

Majority Holds Stock Tax Is
Not Discriminatory Against
Banks

Madison.—Wisconsin's tax on stock of national banks is constitutional and valid, the state Supreme court held Tuesday in the Hartford Bank case. The opinion was written by Justice Rosenberry. Three justices, Vinje, Eschweiler and Jones, dissented.

In upholding the state law under which national bank stock is taxed, the court reversed the decision of the Washington circuit court in favor of the First National Bank of Hartford and dismissed the judgment of more than \$2,000 for personal property taxes paid under protest in 1921.

"It is considered upon the whole case that the tax assessed and levied was a legal tax and that the law of the state of Wisconsin authorizing it is a valid law and within the consent conferred by section 5219, revised statutes of the United States, upon the state of Wisconsin" Justice Rosenberry said, for the following reasons:

"There is in fact no unfriendly discrimination or hostile attitude on the part of the state of Wisconsin toward national banks.

"The law is not in fact discriminatory, does not in fact operate oppressively or harmfully, as is shown by the fact that national banks are prosperous.

NO COMPETITION

"All persons, firms and corporations doing a banking business are required to organize as banks and so become taxable. Constitutional banks are taxed. There is no business conducted within the state which is in direct competition with national banks not taxed as national banks are taxed.

"Moneyed capital in the hands of individual citizens invested in mortgages and securities for their own personal benefit, does not in fact compete as a business with moneyed capital invested in shares of national banks for the business which national banks are authorized to do. If there is any competition as to loans, such competition is within such a narrow and restricted field and so inconsequential in amount as not to be in fact discriminatory within the decisions already cited."

Although the act of Congress under which the state law was enacted has been amended, an appeal to the United States Supreme court is likely, attaches of the state tribunal said.

CITY SAVES \$100,000

The city of Appleton saves from \$100,000 to \$150,000 as a result of the Supreme court decision in the Hartford bank case. If the Supreme court had ruled that the bank stock tax is unconstitutional the city would have been obliged to refund between \$60,000 and \$70,000 already paid by First National bank and Citizens National bank under protest and would have been unable to collect from \$30,000 to \$35,000 which all four banks refused to pay this year.

Four years ago First National bank and Citizens National bank began paying taxes already.

CHANGE TIME AND PLACE FOR MEETING OF HOMEBUILDERS

Henry Boldt Gives Interesting Talk at Institute at Y. M. C. A.

A large crowd attended the meeting of the Homebuilders Institute Monday evening at the Y. M. C. A. Henry Boldt, Appleton builder, talked on the construction of the home and the mistakes to be avoided in building. He started at the foundation and went on through the entire building process. The talk was preceded by a motion picture sent by the University of Wisconsin extension division, entitled, Home Made House Building.

Mr. Boldt discussed the "little" extras needed in building a house and how to take care of them, he described kinds of roofing, chimneys, walks and floors.

Charles Kelly, a member of the program committee of the institute acted as chairman of the meeting.

Announcement was made that next week's meeting will be changed on Wednesday night because of Easter festival at Lawrence Memorial chapel and the inability of one of the speakers to be present on Monday night. The place of meeting also has been changed. F. A. Maeder, itinerant plumbing instructor of the Fox River valley, will be the first speaker. He will talk on plumbing and meeting will be at the vocational school in connection with his regular class of local plumbers. In this way the plumbers in the class will be able to answer questions asked by the homebuilders.

The second speaker of the evening's lesson will be Powell S. Hall, architect, a member of the firm of Smith and Brandt. Mr. Hall will speak on Heating, Ventilation and Humidity.

DEATHS

MRS. HENRY NIEMAN
Mrs. Henry Niemann died in Green Bay Monday night and the body will be brought here for burial Wednesday morning. Funeral services will be at 2 o'clock Wednesday morning in St. Mary church and interment will be in Riverside cemetery. Mrs. Niemann is survived by one son, Herbert, of St. Louis, Mo.

HALEY FUNERAL
Funeral services of Mrs. Robert Haley, who died Sunday at Eau Claire will be held at 2 o'clock Thursday afternoon from the home of Mrs. Jacob Kempf, W. Lawrence-st. The body will arrive in Appleton Wednesday. Interment will be in the Riverside cemetery.

MRS. JAMES GEE
Mrs. James Gee, 68, mother of Ralph Gee, advertising manager of Appleton Post-Crescent, died early Tuesday morning at her home in Madison apartments, Green Bay. She had been an invalid for many years but death came unexpectedly. She spent most of her life in Green Bay and was well known there.

Mrs. Gee was born Aug. 21, 1856. She is survived by her widower, two sons and two daughters. The children are: Ralph Gee, Appleton; Dr. Gerald Gee, Denmark; Mrs. D. S. Nyström, Norway; Mrs. J. P. Bush, Knoxville, Tenn.

Funeral arrangements were to be made as soon as the widower, who is a traveling salesman, could be located.

EDITH DAVIDSON
Edith Mathilda Davidson, 16-year-old daughter of Mr. and Mrs. Oscar Davidson, died Tuesday morning at her home, 1506 S. Kernan-ave. She is survived by her parents, five brothers, Edwin, Charles, Elmer, Merrill and Ferdinand, and three sisters, Tella, Helen and Margaret.

MRS. L. E. CATES
Mrs. L. E. Cates, 66, a resident of Appleton for several years and a graduate of Lawrence college, died Monday morning at the home of her daughter, Mrs. John H. Foulkes, at Escanaba, Mich. She was a member of the Women's Christian Temperance union of Escanaba, and was recently elected president of the Ladies Aid society of First Presbyterian church. She was secretary of the Delta County Sunday school association. Mrs. Cates was graduated from Lawrence college in 1878. In the same year she married E. R. Franklin and in 1882 was married to Mr. Cates.

She is survived by five daughters, Mrs. Bessie Embs, Iron River; Mrs. John H. Foulkes, Escanaba; Mrs. Edna Norblad, Astoria, Ore.; Mrs. A. G. Curtis, Fortuna, Mont.; Mrs. Oscar Carlson, Astoria, Ore.; one son, Harold S. Cates, Dekalb, Ill.; and one brother E. H. Stoddard, Fond du Lac. The funeral services will be held at the First Presbyterian church at 2:30 Wednesday afternoon with the Rev. John B. Hubbard officiating.

BANK STOCK TAX LEGAL, COURT SAYS

ing the tax under protest and threatened to sue the city to force a refund of the tax. This year all four banks refused to pay the stock tax and challenged the city to sue for it. A few weeks ago the banks made a compromise proposition to the city, agreeing to pay half of the assessed tax but the proposal was rejected by the city, pending the decision in the Hartford case.

FORCE BANKERS TO PAY
According to A. C. Basser, steps will be taken at once to compel the banks to pay the tax which they refused to pay last January.

Appleton banks objected to paying a tax on bank stock on the ground that it discriminated against the banks and in favor of other institutions doing similar business. The tax in reality is assessed against the owners of bank stock but the law provides that it may be paid by the banks and charged to expenses.

Bankers contended that the banks should be taxed on the basis of income, as other institutions are taxed. It was pointed out, however, that until recently the federal law prevented states from taxing the income of national banks and the bank stock tax was adopted as a substitute. The impediment against taxing bank incomes now has been removed but it is not known whether an effort will be made to tax banks on that basis or whether the present tax plan will be continued.

FATHER OF NEENAH WOMAN ENDS LIFE BY HANGING

Neenah—Anton Strasser, 73, of Oshkosh, father of Mrs. Martin Wolf, Lake-st., Neenah, committed suicide by hanging himself in a shed at his home some time Sunday night or Monday morning. The body was found Monday by a daughter. Mr. Strasser had been in ill health for some time.

He is survived by the widow and three daughter, Mrs. Paul Hildendorf of Milwaukee, Mrs. Henry East of Oshkosh, and Mrs. Martin Wolf of Neenah.

FARM MEN ORGANIZE TO PROTECT HORICON MARSH

By Associated Press
LEROY—The Horicon Marsh Protective association was organized here Sunday by 125 farmers, owners of reclaimed or partially reclaimed marsh land, to combat any effort to reforest the marsh. M. Hammond, president of the organization announced Tuesday.

The action of the farmers, who represent ownership of approximately 12,000 acres was brought by a joint resolution now pending before the judiciary committee of Wisconsin legislature directing the attorney general to make inquiry into the proposal of restoring the Horicon dam and reforesting the marsh. The association decided to strictly enforce all trespassing laws against hunters.

THINK SLEUTH'S SLAYER WAS CHICAGO GUN TOTER

By Associated Press
MILWAUKEE—Police Tuesday were working on new information in connection with the death of Detective Harry Schmidt, who was shot to death here Saturday night. A man, whose identity is being guarded by the police told them early Tuesday that he knew Schmidt's slayer.

According to the information there were two men hiding in a doorway where Schmidt was killed, both were Chicago gunmen, who held a grudge against Schmidt.

In addition to this information the police were tracing a man who was driven to Racine by a taxicab driver.

Mr. and Mrs. C. W. Fichtner returned to Milwaukee Monday after spending a few days with Mrs. Nicholas Colten.

COUNT SALM TO CHANGE FLAG

It is reported from abroad that Count Ludwig Salm, the husband of Millicent Rogers, New York heiress, is contemplating his adoption by a Hungarian named Covas. This, it is suggested, is in order to block any move the Rogers may make to have the count's marriage with their daughter annulled in the New York courts. The count had obtained a divorce in Hungary prior to his marriage to Miss Rogers, but because of the Hungarian laws provide that only citizens of that country may be divorced there, and as a result of the war the count ranks as an Austrian. Salm's divorce was invalid. By becoming a Hungarian citizen, Salm hopes to block any such move. Count Salm is shown refereeing a tennis match at Cannes, where he is now.

CLOTHING LOST IN CLOSET FIRE

Department Adds Four More Runs to Its Record—Two More Grass Fires Occur

Clothing and other articles in a closet were consumed in fire at 5:40 Tuesday morning at the home of John Delcorps, 314 E. Atlantic-st. Two grass fires and one other alarm also were sounded within the last 24 hours and helped to set the record for the largest number of runs within a given period in years.

The loss in the Delcorps fire will amount to about \$250. Practically all the contents of the closet was consumed and some damage was done to the walls. Chemicals were used to extinguish the flames.

Grass fires occurred Monday afternoon at the A. Weissgerber home on E. Wisconsin-ave at 130 and on Victoria-st near Appleton Junction at 345. Water was used to extinguish the latter fire to protect fences and outbuildings owned by Chicago and Northwestern Railway company.

A large pile of rubbish burning at N. Sherman-pl at 7:30 Monday evening alarmed some of the people in the neighborhood and they summoned the fire department. Its services were not needed, however.

ROBBERS TAKE \$11 FROM CASH DRAWER

Break Into Conkey Book Store During Night and Loot Cash Register

Robbers Monday night entered the P. M. Conkey bookstore on E. College-ave and escaped without leaving a trace after looting the cash register of about \$11 in cash. The store was closed at 8 o'clock by Hugh Pomeroy, manager, after he had checked up the day's receipts as usual. At 7 o'clock Tuesday morning it was opened by Earl Stecker, a youth employed by Mr. Pomeroy.

Shortly after he had opened the doors, Stecker went to the cash register to make change for an early customer and discovered that it had been looted. The cash drawer was closed when he arrived, he said.

The thief or thieves left no clues, according to Mr. Pomeroy and so far as was known Tuesday morning touched nothing but the cash register.

The police were notified at once. Chief George T. Prim declares after investigating that entrance was gained through a trap door next to the rear stairway leading to the hall above the building. The door was forced to pull out a staple of the latch. Nothing was disturbed in the place except the cash register. The theft was committed after midnight because the janitor visited the building between 12 and 1 o'clock to bank the fires and found everything all right then.

SENATE SCHEDULES 7 PUBLIC HEARINGS ON 7 NEW MEASURES

Four Bills Refer to Teacher's Annuity and Retirement Funds

Madison — Seven public hearings for as many legislative bills are scheduled for Wednesday before senate committees. Four of these have reference to the teachers' annuity and retirement fund in cities of the first class. Of these, two are by Senator Ben Gettelman and one each by Senators Irving Michigan and Joseph Padway, all are scheduled for hearing before the senate committee on education and public welfare.

Senator Michigan's bill provides for the investing of the funds in such securities as trust companies are authorized to invest in, in place of savings banks as the law now provides. One of the Gettelman bills provides that the city attorney shall act as legal advisor of and attorney for the board having charge of the fund, in all matters referred to him by the board except as the board may otherwise direct. The present law gives the city attorney full power to act in all legal matters which the boards may have in connection with the fund. The other Gettelman bill gives the board a specific authority to engage outside counsel.

The Padway bill provides new regulations for contributions into the teachers' fund. Teachers may elect in writing to have the managing body of the schools in cities of the first class reserve from the salary of such teachers amounts provided in a new subsection and paragraph.

Easter Suits
In Which Quality Is Considered Before Price

The style of the new suits demands good materials, carefully tailored, if they are to retain their free and easy lines, and not become shapeless bags.

In materials and making our suits are built "up to a standard, not down to a price." Yet they are not expensive—their prices are but little more than you are asked for doubtful clothes. But what a saving, when you consider your clothes cost as you should—by the year, rather than by the suit.

\$35
buys a wonderful suit here—fabrics are guaranteed by the manufacturer—tailored to keep their shape and your fine appearance throughout the life of the suit.

REENGAGE HEILIG AS DIRECTOR OF VOCATION SCHOOL

Trade School Board Offers Contracts to All Members of Faculty

Herbert Heilig was reengaged as director of Appleton Vocational school and all full time faculty members were offered contracts for another year at a meeting of the vocational school board Monday noon. Mr. Heilig, who came here on a year's contract while Director W. S. Ford was on a year's leave of absence at Columbia university will be given a new contract dating from July 1. Mr. Ford has announced his resignation as director to remain at Columbia where he won a scholarship.

The board authorized an arrangement with Louis Hintz to remove the brick dwelling on the property east of the vocational school. It is planned to build an addition to the school on the property but it is not probable this will be done for two or three years.

Fulltime teachers now on the vocational school staff are V. R. Chaloner, James Cladek, F. F. Martin, E. M. Lattala, Clark Clavett, Mable Burke, Christine Zier, Mrs. M. S. Peerenboom, Mrs. John Morgan, Mrs. Bertha Barry, and Miss Ida Wunderlich. The board voted to retain Loren Knapstein as secretary to Mr. Heilig.

GRANT PERMIT TO PUT GARAGE ON LOT LINE

Roscoe Gage, 420 W. Fifth-st will be permitted to build a garage on the line of his lot, the zoning board of appeals decided at its meeting Monday morning. The distance between the house and the edge of the lot on which it is built is too small to permit compliance with the zoning ordinance, and as there is a garage on the line of the next lot, the board permitted Mr. Gage to erect one next to his neighbor's.

HI-Y DEPUTATION TEAM CONDUCTS C. E. SERVICE

Hi-Y club deputation team conducted services of the Christian Endeavor Society of First Congregational church at the church parlors Sunday evening. The team is composed of Edward Blessman, club president, Everett Roudeshush, John Catlin, Harold Eads and Kenneth St. Claire.

After the services talks were given by Edward Blessman, Kenneth St. Claire and John Catlin. Eads and St. Claire sang several selections and Everett Roudeshush played a number of piano solos.

When You Catch Cold Rub on Musterole

Musterole is easy to apply and it gets in its good work right away. Often it prevents a cold from turning into "flu" or pneumonia. Just apply Musterole with the fingers. It does all the good work of grandmother's mustard plaster without the blister.

Musterole is a clean, white ointment, made of oil of mustard and other home simples. It is recommended by many doctors and nurses. Try Musterole for sore throat, cold on the chest, rheumatism, lumbago, pleurisy, stiff neck, bronchitis, asthma, neuralgia, congestion, pains and aches of the back and joints, sprains, sore muscles, bruises, chilblains, frosted feet—colds of all sorts.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole. 35c and 65c, jars and tubes; hospital size, \$3.00.

Better than a mustard plaster.

MINISTERS PREACH ON 7 LAST WORDS

Arrange Services for Union Meeting of Churches on Good Friday Morning

The Seven Last Words will be discussed by local ministers at the union services at 10:30 Good Friday morning at First Congregational church. Dr. Virgil B. Scott, pastor of Memorial Presbyterian church, is general chairman of the service. The texts and the ministers who will discuss them follow:

"Father, forgive them, for they know not what they do," the Rev. H. A. Bernhardt; "Today shalt thou be with Me in paradise," the Rev. W. R. Wetzeler; "Woman, behold Thy Son. Son, behold Thy Mother," Dr. H. E. Peabody; "My God, My God, why hast Thou forsaken Me," the Rev. E. M. Salter; "I Thirst," the Rev. Edward Nuss; "It is finished," the Rev. J. L. Menzner; "Into Thy Hand I commend My Spirit," the Rev. A. T. Erickson.

Dr. H. E. Peabody will deliver the invocation, the scriptures and a prayer will be delivered by Dr. Scott and the Rev. H. A. Bernhardt will speak the benediction. Special music will be arranged for.

BOYNTON TELLS BOYS ABOUT LIFE OF MARINES

Twenty-three Months in the Marines was the subject of a talk by C. L. Boynton, activities secretary of the Y. M. C. A., at a meeting of the Knights of Sir Galahad club and members of the boys' division Sunday afternoon. About 60 boys were present.

Mr. Boynton appeared in uniform the told of the organization and active life of the United States Marine camp on Paris Island, where he served as a Y. M. C. A. secretary during the war. He showed pictures of the camp and its work to illustrate his talk. The talk was followed by three reels of motion pictures and an "ice cream" party.

Noted Bass Soloist Is Engaged For Festival

Solo talent which will assist the great chorus in the annual Easter community musical festival at Lawrence Memorial chapel Sunday and Monday evenings is to be of the highest obtainable this year, according to announcement of Jean Carl J. Waterman, director of the production.

He has obtained among others John T. Read of Chicago, a bass singer, who is admirably suited to the solo parts of the difficult Bay's "Cretion." Mr. Read is new to most Appleton music lovers but he has sung in a number of Wisconsin cities.

Audiences at the festival will like him, Mr. Waterman says, because his enunciation is especially distinct. He sings in a straightforward, convincing way. His voice is well rounded and resonant and even in range.

Comments which have appeared in the press concerning this prominent bass singer praise him for his work in oratorios. He is described as the luminary of many a program.

Other soloists will be Helen Fouts Cahoun, soprano, Chicago, and R. Fred Wise, tenor, Chicago. With these artists and the accompaniment by Percy Fullinwider's 25-piece orchestra, piano played by Miss Irma Sherman and organ by LaVahn Maesch, the festival will be the musical triumph of Appleton's history.

Seats are selling readily for the program next Monday evening. The public seems to like the plan of reserving the chapel so that it is not necessary to come long before 8:15, the hour when the program opens. The confusion of crowds also is avoided, they find, and gladly pay the admission, which is only enough to cover expenses. Those who would rather attend Monday night may reserve their seats now at Bolling drug store.

The Appleton public is invited free Sunday night, but will be asked for a silver offering.

POLICE ISSUE 56 PERMITS IN DAY

Automobile purchases are taking place so fast that the police department broke all records Saturday for the number of Appleton permits issued for use of cars until state licenses arrive. Fifty-six applications were received, for which plates were issued. The desk sergeants were kept busy constantly registering those who called.

This made the total number of permits issued this season 407. Chief George T. Prim declares that quite a number of the 56 on Saturday were for new cars purchased. He also finds that large numbers of used cars are being sold at this time.

Autolists find the local permit plates quite a convenience while waiting for their state licenses. They are not molested by the police of other cities as is the case where they carry no license numbers at all. So many cars have been stolen, especially Ford and Chevrolets, that almost every police department will stop those without identification tags.

Close Friday and Monday classes in Appleton vocational school will continue throughout holy week, with the exception of Good Friday, according to Herb Heilig, director. There will be no classes on Easter Monday, Mr. Heilig says.

FORMER LAWRENTIANS FORM VALLEY SOCIETY

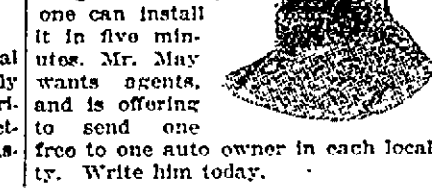

The Fox River Valley Lawrence club was organized at a meeting of former students and alumni living in the valley and of faculty members of the college at Hotel Northern Saturday evening. More than 70 were present.

A constitution was outlined and A. P. Anderson, alumni secretary, discussed the plan of organization. George Nixon sang a group of solos.

Makes Autos Go 49 Miles on One Gallon of Gas

Sioux Falls, S. Dak.—James A. May, of 4647 E. Street, has perfected an

amazing new device that cuts down gas consumption, removes all carbon, prevents spark plug trouble and overheating. Many cars have made over 49 miles on a gallon. Any one can install it in five minutes. Mr. May wants agents, and is offering to send one free to one auto owner in each locality. Write him today.

ANOTHER BORAH WARNING

Senator Borah has issued another one of his characteristic warnings against American entanglement in the affairs of Europe, but more important than this is his reference to the modern tendency to build up a great bureaucratic system in our domestic government. Everytime, he says, that politicians, fanatics or well meaning reformers have a grievance against social or economic conditions, they propose to remedy the evil by changing our system of government. To them we owe fantastic proposals for the benefit of the farmer, of the laborer or the consumer. These include schemes to create immense export grain corporations, amending the federal constitution to permit congress to re-enact laws declared unconstitutional by the supreme court and various other proposals. We have had the federal constitution amended so many times in recent years, it is hard to keep track of the changes. We seem to have reached a state where we are willing to make a change merely for change's sake. Mr. Borah calls it "fatuous stumbling in governmental affairs, more pronounced than in the gradual but certain destruction of the states and the centering of all power, all governmental activities, at Washington."

Continuing, the Idaho senator says, "As a result of well organized and venal propaganda on one hand and sheer political expediency on the other, we are building up a bureaucratic form of government, the expensive, the most burdensome, the most inefficient, the most arbitrary that has thus far been permitted to misgovern the human family." He holds that unless there is a check of the tendency there will not be a practice or custom, or habit of the American people that will not be censured from Washington. "Not even," he declares, "in all the relationship of parent and child, of families and home, will there be anything sufficiently private or sacred to exempt it from the furtive eye of some special agent."

We know what this is in Wisconsin. We know what it has been under the prohibition amendment. We know what it is in the regulation of child labor and in hosts of other things. It has been but a few years ago since these things were left to local regulation or to the conscience and freedom of the individual. If we keep on at the rate we have been going, it will not be long until the government tells us what we shall eat, when we shall go to bed, how we shall dress, and probably what we shall think. They do that in Russia, where they have attained perfection in bureaucratic government.

WAR'S GREATEST GIFT

Opinions that the World war would leave the human spirit cleansed and reformed in its vast kiln of suffering have proved to be empty dreams. Belief that the experience of the war would guarantee peace among men has passed into disillusionment. Of all the bequests that the war was expected to leave, by far the most important appears to be the one stressed by John Walker Harrington in April's issue of Current History—the contribution to medicine and surgery.

Human disease and suffering will be less forever and human progress toward the final banishment of disease is already tremendously advanced, by the experience

of the disciplined surgeons who worked to keep fighting men on the battle lines. Mr. Harrington cites an imposing list of these services to the science of healing:

The development of the technique of anesthetics—use of gas and oxygen, injection of "locals," mouth doses mixed with oils as used in industrial accidents, deep antisepsis with chlorine and quinine ingredients, and lockjaw antitoxin have incalculably reduced the pain and the death rate of surgery and the fatalities from means of rendering patients unconscious.

The sun, now so commonly used to relieve tuberculosis, was first dragooned into widespread service in the treatment of recuperating victims behind the lines.

Bone grafting became an art: plastic surgery, the sculpture of flesh, rendered forever lighter the burden of the mutilated human being in peacetime accidents as well as in war. Artificial arms and legs marked a wonderful scientific improvement. Cripples were restored to work and to self-support.

Our teeth will always have better care and the effects of their diseases upon the body will be understood because of the study of jaw injuries and poisonings during the war.

In medicine, there has been the great development of prophylactic methods—preventive vaccinations and sera: of the science of nutrition, the prevention of fat and diabetes and various digestive disorders. The famous discovery of insulin in reality is a war product. The diseased mind has been studied, the mysterious troubles of the nervous system probed as it was never imagined they could be. Mental and physical subnormality and its causes have entered a new field of research.

The war killed many: in time its lessons in medicine and surgery may far more than overbalance that loss. Of course the sacrifice of human beings in an immense clinic of the sort—particularly of the finest human stock the world possessed—will never be justified for any scientific reason. War's brutality and its destruction of capital, its undermining of morals and shattering of character, its weakening of fine traditions and its spreading of sorrow and despair, are a loss no scalpel and no medicine developed by the war will repair. But to the practical question where the balance lay in matters of physical suffering and death, it is more than possible that we shall have to say war gave more than it took away.

STOCK AND THE AUTO

Great automobile companies had originally one-man, one-family or small group control. The shift toward corporation management with widespread public ownership of shares is strikingly instanced in the purchase by a New York banking firm of the Dodge Brothers plant, which, it is expected, will eventually be run by a directorate elected through votes of thousands of stockholders. It is reported some \$100,000,000 in stock will shortly be offered buyers throughout the United States.

Purchases of this kind mark the end of the adventure era, the age of infant growth in the motor industry. General Motors, Studebaker, Hudson and most other motor stocks today are purchasable on the stock exchange; now Dodge, after its romantic history, is added to the growing list. A splendid service has been performed by the pioneers—the men who built and invented and developed cars for pride's sake, holding control close to themselves, while they scorned dividends and poured earnings back into machinery and equipment. But this vast new industry has become more or less stabilized at last. The "old men" have died off or taken a rest; and except for a few like Henry Ford, who still refuses to brook the interference of any minority stockholders, its leaders have turned it into the stock market like any other business.

The passing is in a way to be regretted. We may be confident that the coming of the motor age would have been retarded if automotive development had been in the hands of directors harried by stockholders on a constant stalk for dividends. We may find it hard to believe that the same progress will be made without this element of personal pride in achievement, the building of a name, the giving of inventive service to an appreciative public. But the press of a terrifically competitive business and the prodigious of shareholders no doubt will be, in this latter day, more of a spur to industrial energy than management by the estates of dead men. And in many cases that has been the only choice.

Health Talks

BY WILLIAM BRADY, M. D.
Noted Physician And Author

Dr. Brady will answer all signed letters pertaining to health. Writer's names are never printed. Only inquiries of general interest are answered in this column, but all letters will be answered by mail if written in ink and stamped, self-addressed envelope is enclosed. Requests for diagnosis or treatment of individual cases cannot be considered. Address Dr. William Brady, in care of this paper.

FIRST HOT THEN COLD.

A physiologist's observation a few years ago, that, contrary to the general theory of the medical profession and the belief of the laity, chilling of the skin surface is attended with a blanching of the mucous membrane in the throat and nose and probably a lowering of the temperature of the bronchial tubes, amounts to a stumbling block in the path of the "nation wide intensive study to determine the nature and cause of colds." This nation wide "study" is in effect now. The United States Public Health Service gathers statistics and data, such as the gossip of college students about their "colds" and issues tablets and reports thereon, and the American Medical Association Journal propagates the idea among its 35,000 or 50,000 medical readers, and one of the medical journals' cost then rehashes the stuff in the form of syndicated newspaper stories which are available to newspapers anywhere if they care to print them. The "study" has its humorous aspects. One of them is the funny capers performed by the publicity agents in their scramble to readjust their line of argument to conform with the physiologist's observation about the effect of chilling.

You see, the ancients—and the old women of various genders today—have based their arguments on the older theory, namely, that when the surface of the body is chilled in any way, there is a resultant "drawing of the blood inwardly" and so a congestion of the mucous membrane lining nose, throat, bronchial tubes or elsewhere. And by some not very clear process this congestion presently becomes an alleged "cold" in the chosen spot. It seems ridiculous enough to trace the thing from source to effect; it must seem particularly funny to any individual who occasionally indulges in a cold shower bath, or a swim, or an air bath in the winter time.

Then, too, there is still a third line which the old women of the propaganda can fall back on in time of famine. This line is an argument to the effect that "during high winds or chilly damp weather, as a result of wetting of the garments, and from insufficient cover at night" (I quote from Pyle's Personal Hygiene, a book that should be in every museum), the smooth muscle fibres of the skin fail to contract as they should, and therefore the blood is not driven from the surface, and hence there is an excessive cooling of a large amount of blood—and there you are, the rest of the rest of the way alone to figure out how that gives you a "cold in the head." (The edition of Pyle I quote from was published in 1915).

Well, this affords three avenues of escape for the nation wide propagandists who are striving to revive the moribund catching cold delusion.

QUESTIONS AND ANSWERS

Twelve Miles a Day.
I walk four miles to work every day and four miles home, and at my work I am on my feet all day. Some friends say this is too much, that I will get fallen arches. Please advise me. (P. 1)

Answer—I should say it is a good habit.
Tonsils and Adenoids.
Is it harmful to have tonsils and adenoids removed when the girl is 13 years old? (Mrs. B. E. M.)

Answer—The patient's age is immaterial.
Motherhood.
Please tell me if there is any chance for a person to live who is a prospective mother at the age of 43 years. (Mrs. P. A.)

Answer—The woman who becomes a mother for the first time after 40 has rather a better expectation of life than the woman who never becomes a mother at all.

Foul Sweat.
Some time ago you gave a fine formula for the relief of foul sweating of the feet. It fixed us out fine, but we have lost the receipt. Now our son is troubled again, and we should be grateful if you will give the directions again. (S. I.)

Answer—Solution of formaldehyde, also called formalin and formaldehyde, the standard solution containing 35 to 40 per cent of formaldehyde gas in water. Use one ounce of this standard formaldehyde solution in water sufficient to fill a half pint bottle. Sponge soles with it once daily for a week, allowing it to dry on the skin.

JUST A GENTLE reminder that to-day you have another opportunity to exercise your inalienable privilege of franchise. And if you fail to vote, don't howl about the result afterwards. Next to the privilege of voting we prize most highly the privilege of howling. So then, let's howl, if it is necessary, but let us vote first.

Yes, ladies, this is the suffrage you had been stumping for during the dark ages.

TO PROVE THAT CITY OFFICERS STILL BELIEVE THAT FOLK GET UP EARLY IN THE MORNING, THEY OPEN THE POLLS AT 6 O'CLOCK.

Elections are a good deal like basketball tournaments. First they stage a free-for-all in the circulation of nomination papers. Some fall by the wayside. Then they hold the consolation and semi-final series at the primaries. In the last fracas they prove that there's many a slip 'twixt the cup and the lip.

Along with the famous "brothers" of history, such as the James Brothers, Smith Brothers, Wright Brothers, we must reserve a berth in the Hall of Fame for the Dodge Brothers.

John Duval Dodge, one of the famous Dodge family, has begun court action to claim his share of the Dodge millions. We don't understand the connection of an incident on College Ave the other night, but we'll relate it anyway. Two young bloods were having a jolly time with a bottle. Just then one of them saw someone crossing the street in their direction, and the boy exclaimed, "John Duval Dodge!"

HIS ANNUAL SLICKING-UP

Expert Stamp Licker Now Is - Man Of Wealth

From The New York Post.
For many years Otto H. Kahn has been hiding one of his lights under a bushel. Mr. Kahn as a financier, art patron, and all-around public man, is well known. But only now is he disclosed as a record holder in a defunct indoor sport.

Mr. Kahn wouldn't be where he is today without that record. By establishing it he was lifted out of the subterranean chambers of office-boydom and placed on the royal road to success.

He revealed the beginning of his success to members of the Harvard Business School club in an address at the Harvard club one night recently and outlined 10 rules for going ahead in business. The revelation of his record holding came when Mr. Kahn sought to emphasize his first rule, that every task, however trivial it may seem, is an important one for the younger man getting on in the world.

"Let me tell you, as an instance," he said, "how and why I got my first promotion in business. The first firm by which I was employed sent out many hundreds of circulars daily. Sponges for the wetting of stamps were unknown. The process employed was licking the stamps. Three of us, sitting in a line, were engaged for a certain period each day in that proceeding.

"By dint of strenuous application I became an adept at the job and accomplished the triumph of holding the office record for speed in licking stamps while yet observing the requirements of neatness and accuracy in placing each stamp straight and square in its proper place in the upper right-hand corner of the envelope."

"Two or three times I noticed our boss standing near where we worked. After a while he called me before him and informed me I was promoted out of my turn in recognition of the zeal, energy and accuracy with which I had accomplished the functions of a stamp lick."

Mr. Kahn's other nine rules for success are: (1) Remember that the most serviceable of all assets is reputation. (2) Think. Exercise the spring of your brain. (3) Go for a ride on the horse of your imagination from time to time. (4) Be ready, be fully prepared, be patient. (5) Be neighborly, be a good sport. (6) Work hard don't spare yourself, but don't become a machine. (7) Take an interest and a due share in public affairs. (8) Meet your fellow men with confidence. (9) Avoid ostentation.

Q. Has Helen Keller ever married?
W. H. T.

A. Miss Keller, who is now about 45 years of age, has never married. This remarkable woman, blind and deaf since infancy, has learned to talk, and is now making vaudeville appearances.

Q. Suppose yourself on an ideally smooth plane, how is it possible to get off? E. E. C.

A. The Bureau of Standards says "If you throw something backwards, you will go forward until stopped by resistance of air. Your breath will do."

Q. Was Sousa in the Marine Band or was he merely its leader? K. J.

A. In 1880 Sousa enlisted in the service of the United States and was appointed leader of the United States Marine Band. He resigned in 1892.

Q. What jet velocity has professor Goddard been able to obtain with his rocket, when discharging into a vacuum? What sort of fuel does he use?
W. R. R.

A. Professor Goddard of Clark University, Worcester, Massachusetts, furnishes us with the following information: "The highest jet velocity in a vacuum, measured experimentally, is 7833 feet per second. Results of experiments indicate, however, that the highest jet velocity in air, 8,000 feet per second, would have been 2,600 feet per second in vacuum. Liquid propellants are employed at present, but

YOUNGEST LEGISLATOR

When Bernard Mathfowetz, 21, takes his seat in the Wisconsin General Assembly he will have the distinction of being the youngest member ever to sit in that body. He received a large majority over his nearest opponent in the recent primary.

Young Mathfowetz, now a senior at Northland College, Ashland, intends to study law at the University of Wisconsin when not attending legislative sessions in the state capitol.

Besides financing his own high school and college education, the youth has earned enough money to put his sister Rosa through high school and the normal school course.

details are being withheld until after a test has been made.

Q. Please list the important earthquakes since 1850. A. H.

A. The following are some of the heaviest since 1850: August 31, 1886, Charleston, South Carolina; India earthquake in 1897; Kangra earthquake in 1905; California shock of April 18, 1906; Messina earthquake in 1908; Tokyo earthquake in 1923.

Q. At what age must children attend school? M. L.

A. Compulsory school attendance ages vary in different States. In no state are children compelled to start to school before the age of six. New Mexico and Ohio are the only States which specify this early age. In several of the southern States attendance is not compulsory after children are 14; a few states set 15 as a limit; while about 30 states require attendance until 16 years of age; a few States say 17; and several 18.

Q. Please explain about a person's shadow when passing a light. L. C.

A. A shadow is formed when rays of light are obstructed by an opaque body. Rays of light radiate in straight lines in all directions. As a man approaches a street lamp, the light shines on his face and therefore his body casts a shadow behind. In passing the lamp the shadow naturally moves with the man so that when he is in front of the lamp the rays of light strike his back and therefore cause the shadow to fall before him.

Q. Of what material are the dolls of the Hopi and Apache Indians made? H. S. W.

A. The Bureau of American Ethnology says that the dolls of the Hopi Indians are never made of clay but are manufactured from the subterranean branch of the cottonwood tree. They are not necessarily rain gods although the need of rain is so omnipresent and these images are copies of certain dolls which appear on rain altars, that they are sometimes called rain gods. They are, however, not gods but dolls and are made by the parents and given to the children as playthings. The dolls of the Apache, as well as certain other tribes, are often made of adobe and are probably used in much the same way as the Hopi dolls.

Q. How many immigrants have been admitted since 1847? J. O. A.

A. There have been approximately 24,576,404 immigrants admitted to the United States since 1844.

Pennant For Winners In Girls' Meet

Final plans for the Girl Scout and Camp Fire Girl field meet in May were made at a supper meeting of representatives of both groups in Hotel Appleton Monday night. The meet will be held in Jones park on May 23. A new pennant is to be awarded to the winner of the field meet this year, for the 10th pennant has been won three times in succession by the Shamrock troop of Girl Scouts and has become the troop's property.

The old pennant was made in Camp Fire colors, brown and gold, and the colors used in the new one will be blue and white, Girl Scout colors. It will be awarded to the group winning the most points at the meet. An indoor baseball will be given to the group that has the best attendance at the meeting and a 5-pound box of marshmallows will be awarded the troop that composes the best song. The song is judged for delivery and content.

GIRL'S ASSAILANT HELD TO BE KRUSE

Police Arrest Him for Alleged Attack While Young Woman Was Crossing Campus

The assailant of a young woman passing through Lawrence college campus on the evening of March 21 has been identified by the police as George Kruse. He was arrested on a charge of assault and battery and was to be arraigned in municipal court Tuesday afternoon.

It was alleged by the young woman that a man stepped out from behind a tree on the campus as she was walking through there about 7 o'clock in the evening. He held her arms fast behind her and as she was about to scream clapped his hand over her mouth. She then was thrown to the ground. Then man fled when he heard people approaching.

Kruse was seen on the street later by the young woman, who readily identified him. After his arrest she identified him again, as did another girl companion and two young men who were on the campus as Kruse made his escape.

The assailant said he could not recall what happened at the campus and the police allege he was under the influence of liquor at the time. He was recently placed on probation for another offense and Tuesday was his morning to report to the judge. He appeared at the courthouse but was in custody of policemen.

HIGH SCHOOL WILL
SEND SINGERS TO
OSHKOSH MEETINGBest Vocalists and Musicians
Are Selected at Tryouts
In School

Kaukauna—Solo contests to determine who will represent the high school in the state music preliminary contest in Oshkosh April 24 and 25 were held Monday afternoon in the west room of the high school. Sixteen students competed in piano solos, alto, soprano, tenor and bass selections.

Lozelle Driessen was named first choice as piano soloist. Kenneth Ryan was the only other candidate. Six girls participated in the girls' solo contest. His Nagel was pronounced the best soprano and Lucille Zink the best alto. Catherine Mayer and Lozelle Driessen also were mentioned among the best.

Carl Grimm, bass, won the chance to represent the school in the boys' singing contest and Alex Jacobson, tenor, was named second best. Ten boys appeared in the competition. The first movement from Beethoven's Sonata Opus No. 49 was the piano selection. The girls' candidates sang "Daisies" and "Rose's Cup." In the boys' contest "O, Heart O Mine" was used.

Judges for the contest were Miss Florence Harpert, music director of First Presbyterian church, Kaukauna; Mrs. Annette Simola, St. Michael's, chairman of the music economics club, Neenah and Menasha; and Mrs. Max Strehlow, choir leader of East Moravian church, Green Bay.

The judges had a difficult task in picking out the best singers and in a number of instances the candidates were called back after the contest to sing again. The contest was conducted with Lester Lindermuth as chairman. Miss Flora Helso, music director, has been ill the past week and has been unable to take charge of her work. Music work in the high school has continued, however, with Zita Cerviere, glee club soloist, in charge.

Candidates for the girls' pianists were Blanche Jirkovic, Catherine Mayer, Cordele Runte, Lucille Zink, Lozelle Driessen and His Nagel. The boys were Carl Grimm, Willis Miller, Walter Dittler, Walter Kilgas, Edward Heiding, Alex Jacobson, William Woolz, Kenneth Ryan, Harold Coleman and Jack Parant.

WANT CITY TO PAY
MORE HYDRANT RENT

Kaukauna—The city electric and water department has filed a petition with the Wisconsin Railroad rate commission for permission to raise the rental on fire hydrants from \$20 a year to \$50, the amount being average received in most cities of the country. A hearing on the petition will be conducted in the council chambers of the municipal building, Monday, April 13.

The proposed raise will have no effect upon the regular consumers. The plan is merely to increase the rental in order to offset city taxes which amount to approximately \$4,700. It is expected there will be no difficulty in having the petition granted since it is understood a representative of the rate commission several years ago suggested the raise, with an increase in regular water rates. Local utilities officials, however, are interested in keeping the water rates as low as possible and as a result are endeavoring to attempt to secure increased revenue through higher rates.

Social Items

Kaukauna—The Women's Foreign Missionary society of Brokaw Methodist church will meet at 8 o'clock Wednesday at the home of Mrs. Stanley Beguhn, 125 Dayton. Mrs. Gus Boettcher will assist as hostess. Mrs. J. B. Delbridge will be in charge of the program.

Mr. and Mrs. Henry Nagel entertained eight couples at a dinner party at 6:30 Sunday evening in honor of their daughter, Miss Ella, whose birthday anniversary occurred Sunday. The evening was spent in social entertainment and dancing. A number of the guests were from Appleton.

Sixteen friends surprised Ernest Landermann at his home 226 Sixth Sunday evening. The evening was spent in playing cards and social entertainment.

STOLEN CAR FOUND
FIFTY MILES AWAYThieves Who Took A. O. Zerrner's Cadillac Abandon
It at Split Rock

Special to Post-Crescent
New London—The Cadillac belonging to A. O. Zerrner of this city, and which was stolen while parked in front of the Congregational church Sunday evening, was found at Split Rock, 50 miles away, early Monday morning.

The thieves had evidently gotten out to examine the gas tank, and in doing so, let out the air pressure, and were ignorant of how to get it back in again to start the car.

After abandoning the Cadillac, and stealing another car, which it is said, belonged to the town marshal, the thieves continued on their way.

How many hours of heat from
a ton of fuel?

"35 Hours from Black Knight;

The Black Knight
Challenge!

Black Knight challenges you to a test! Prove the merit of this fuel by an actual test run in your own heating plant, compute your heat hours' cost and then let economy and satisfaction decide. Phone or write our Black Knight Specialist for details today.

THE heat hours a ton of coal delivers is more important in figuring its economy than the price per ton. According to the results of the Flower Hospital, Black Knight was much more economical than the next best coal.

Black Knight means more heat for your money. It averages 76% carbon, all of which is transformed into heat without waste. It cokes quickly on the fire—cakes over and shuts out the air, except that from your draft controls. Then it burns, and burns, steadily—and smokelessly, of course. It leaves an average of 4% ash—50% less than most coals. Moreover Black Knight is a uniform fuel, ton after ton, and year after year.

TEN-CONFIRMED BY WAUPACA CHURCH

Exercises Take Place at Holy Ghost Church—Frank Bradway Is Dead

Special to Post-Crescent
Waupaca—Confirmation services were held at Holy Ghost Lutheran church Sunday morning and the following were confirmed: Alfred Pope, Levi Hansen, Oscar Rasmussen, Signor Hanson, Alfred Ostrom, Elaine Moller, Aelmo Moller, Evelyn Rasmussen, Dorothy Johnson and Elizabeth Larson.

Students of the city schools are engaged with their regular six weeks tests. Only one more period of like time remains within the present school year, the summer vacation commencing the last week in May.

A few of the offices at the county building are being equipped with metal ceilings and are redecorated throughout.

Frank Bradway, 65, died Saturday at the home of his daughter, Mrs. Lars Rasmussen, Elm-st. He was born Oct. 21, 1856, lived the greater part of his life on a farm about three miles east of the city on highway No. 18, and was well known in that vicinity and the city. The decedent is survived by three sons and two daughters, Harvey, Maple Grove; George, Peshtigo; Wayne, this city; Mrs. Leroy Olson, Chicago; Mrs. Lars Rasmussen, Waupaca.

The funeral was held at the home of Mrs. Rasmussen Tuesday. The Rev. Mr. Clevenger was in charge. Burial was made at the Crystal Lake cemetery.

John Larson of Chicago, is visiting his relatives in the city.

Miss Rose Jensen returned to her duties at Do Cane shoe store Monday after an absence of two weeks.

Mr. and Mrs. Fred Johnson and William Goldsmith visited relatives in the city Sunday and returned to their homes in Neenah the same evening.

Henry Henderson, who is confined to his home by illness contracted while at Gills Landing last week, is improving slowly.

Mr. and Mrs. Charles Chesley, Fulton-st, visited relatives at Bear Creek and Clintonville Sunday.

Paul Kinsinger, who was operated upon at Christofferson hospital last Tuesday, is getting along nicely.

Mrs. Lester Laux, W. Union-st, is visiting at the home of friends in Racine.

Judge William Martin was absent from the city on business Monday.

Mrs. Arthur Holmes is assisting in the register of deeds office at the courthouse for a few days.

Fred Hertz of Weyauwega, was a city business caller Saturday.

Albert Jensen, formerly of this city and now of Neenah, has returned to his home after receiving treatments at Christofferson hospital.

Edward Johnson of Wisconsin Veterans Home, is expected home from Tampa, Florida, this week, coming overland by auto.

B. L. Blake and S. A. Looker of Chicago, spent the weekend as guests of relatives near the city.

CLINTONVILLE MAN BUYS SEYMOUR STORE

STAGE And SCREEN

KERRY HAS NEW ROLE
Norman Kerry, whose outstanding work in several recent big successes has established him on a high plane in motion picture portrayals, is Virginia Valli's co-star in "The Price of Pleasure." Universal-Jewel, showing today and tomorrow at the Elite theatre in "The Acquittal," a Universal-

Jewel, and he was one of the all-star cast in "Butterfly," another Universal success.

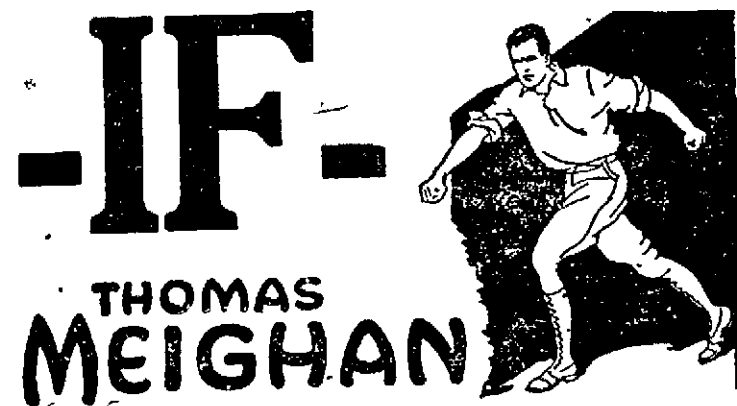

In "The Price of Pleasure" Kerry plays the part of Prince Charming to Miss Valli's Cinderella. But the characterizations of those conceptions of fairy tale personages are extremely modern, for Miss Valli is a shop girl employed in a big department store, and Kerry comes into her life in the guise of a mechanic.

In reality he is the son of a woman of wealth and high social position, a mother whose maternal feelings are controlled by her worship at the shrine of social caste to such an extent that the desires of her children are as nothing compared to her ideas of what is correct.

The supporting cast of this production includes Louise Fazenda and T. Roy Barnes, who have the comedy roles; Kate Lester, George Fawcett, James O. Barrows and Marie Astaire. It was directed by Edward Slioman, from an original story by Marlon Orth and Elizabeth Holding.

LAIRD, NELSON LEAD ELLINGTON MILK PRODUCTION

PIONEER TESTING BODY CONCLUDES ITS SEVENTH YEAR

All Cattle Have Had Tuberculin Test—All Owners Are Raising Alfalfa Hay

John L. Laird and M. E. Nelson hold the top cattle honors for the year ending March 31, 1925 in Ellington-Ottum County Cow Testing association, one of the oldest organizations of its kind in Wisconsin. Mr. Laird had the best producing herd and Mr. Nelson the highest yielding cow. E. M. Bretzick and W. R. Mieling & Son also made extra good showings.

Mr. Laird's herd of grade Guernseys gave 3814 pounds of butter or 7,913 pounds of milk with 4.98 per cent fat test during the year, according to the annual report of Henry Brahm, official tester. Second place went to M. E. Nelson, whose grade Jerseys yielded 3451 pounds of butterfat, 6,681 pounds of milk, 5.2 per cent test. The third high herd was that of E. M. Bretzick. His purebred and grade Guernseys produced 343.5 pounds of butterfat, 7,105 pounds of milk, 4.84 per cent test.

WAS BIG MILKER

The year's high record is held by Fox, a grade Jersey cow owned by M. E. Nelson. She gave 5,633 pounds or 507.1 pounds of butterfat. She had a close competitor, however, in Fan, a grade Holstein of W. R. Mieling & Son. The latter record was 13,490 pounds of milk, equaling 506.9 pounds of butterfat. E. M. Bretzick's grade Guernsey Lily gave 10,555 pounds of milk, 493.3 pounds of butterfat. Mr. Bretzick also had the high 2-year average through Lena, a grade Guernsey which produced 7,849 pounds of milk, 400.5 pounds of butterfat.

Figured in dollars and cents, these liberal milkers were good profit-makers for their owners. The highest herd profit was made by John Laird. Records show that he made \$102.87 clear on each cow. His cow Little Guernsey No. 11 was the best earner in Ellington, clearing her owner \$132.88. W. R. Mieling & Son had second high gross through Fan, a cow earning \$129.63 for the year. Third place went to Fox, the bovine owned by M. E. Nelson. She gained \$128.63.

John Laird's seven year old grade Guernsey returned \$2.37 for every dollar invested in feed, the highest returns for the year. Mr. Nelson's herd returned \$2 for each dollar thus invested and E. M. Bretzick received a return of \$2.01 from his herd.

13 HEAVY EARNERS
Thirteen herds averaged more than 300 pounds of fat in one year, Mr. Brahm declares. The number of cows that finished the year's testing was 232; 40 were sold for dairy purposes, 71 for beef and 8 died. Forty-two cows made more than 300 pounds of butterfat and nineteen were above the 400-mark. The association averaged this year 291 pounds of fat for each cow, 7,272 pounds of milk and an average test of 4 per cent. This average is 100 pounds more of fat than the average for all cows in Wisconsin.

W. M. Bergholz wins honors for having the highest herd average for one month. His cows averaged 521 pounds of fat in March. Gustave Sedore cows produced the most milk for each cow, or 9,264 pounds. Albert Drapthal's cows were next with 9,140. All herds in Ellington association are tuberculin tested and every member grows alfalfa for feed. Fred Bretzick and John Spears are the two pioneer members. They enrolled at organization and have stayed with the association for seven years. The organization now has its full membership and will continue testing for the coming year. It is one of the oldest societies of its kind in Wisconsin. Herds which had a high average of fat during the year are:

DAIRY PRODUCTS ARE LESS IN VALUE

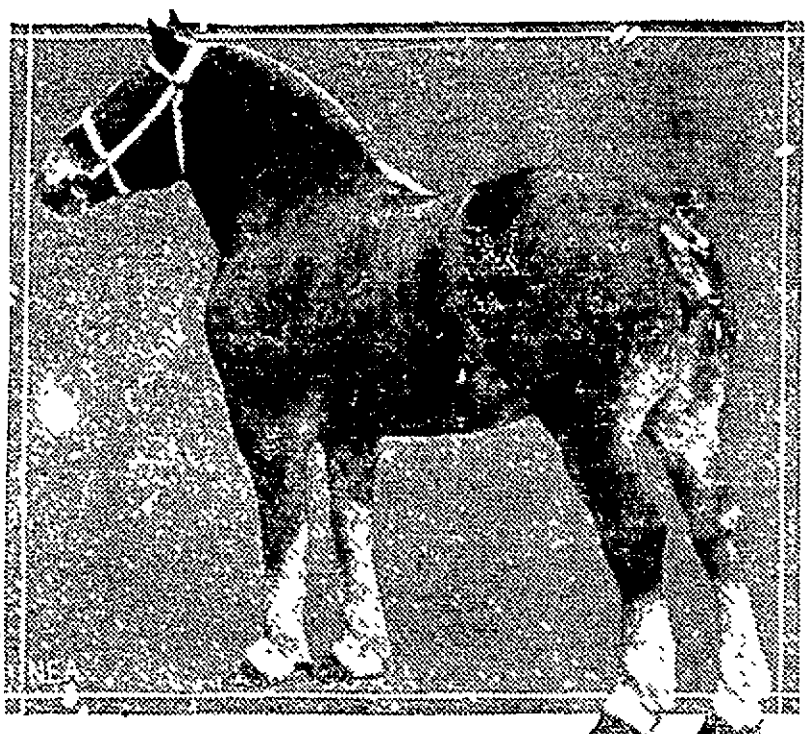

A decrease of \$66,000,000 in the farm value of dairy products produced in 1914 as compared with 1923 is shown in estimates of the United States Department of Agriculture which place the 1924 valuation at \$2,446,145,000 compared with \$2,512,145,000 in 1923.

The decrease is attributed to lower prices for all farm dairy products except buttermilk, whey, and skim milk.

Whole milk sold and consumed on farms last year was valued at \$1,714,000,000 compared with \$1,730,000,000 in 1923; butterfat \$244,000,000 compared with \$245,000,000 and buttermilk \$246,000,000.

The average of prices received by farmers for milk sold for all purposes was 8.255 cents a quart in 1924; 8.547 cents in 1923; and 4.73 cents in 1922.

Farmers Must Avert Decline Of Horses

"PERVENCHE," BELGIAN MARE, IS THE PRIDE OF DRAFT HORSES. SHE WON THE GRAND CHAMPIONSHIP IN 1923 AND 1924 AT THE CHICAGO SHOW.

Washington—No state has a surplus of horses, and today a crisis in the supply appears to have been reached.

Here's how the diminishing supply is rapidly taking place:
1910 to 1920 (10 years) decrease 1,543,130 head.
1920 to 1925 (5 years) decrease 2,000,000 head.

In 1910, according to the United States Department of Agriculture, there were 23,013,902 horses in the country. In 1920 there was a total of 21,472,772.

Horses on farms in 1920 aggregated 13,766,000. This year they totaled only 17,589,000.

The department advises farmers to breed more mares this year than in the past in an endeavor to avert a still greater decline in the animals. A decided falling off in colt breeding in recent years is noted, and officials of the department say as the present supply of "work stock" is depleted through age and death, the shortage of young stock will become apparent.

Uncle Sam Finds Outlook On Farm Best In Years

This is the first spring in five years with any evidence of general stimulus in agriculture, declares the United States department of agriculture in its monthly agricultural situation report.

There are no big agricultural surpluses left, save cattle, the report says, and, judging from the lessened movement of farmers to cities, an increased number of farmers apparently feel it financially safe to stay on the farms this spring and put in their usual crops.

A note of warning, however, is sounded by the department against too great expansion in production. Reports show that farmers plan to increase the acreage of the principal feed crops by nearly 7,000,000 acres above that grown for harvest last year, while the outlook is for smaller numbers of livestock to consume the crop.

"It seems doubtful," the department says, "if the general expansion of production contemplated by farmers would be to their best interests. Increased returns for the crops of 1924 were due largely to reduced supplies, either in this country or abroad rather than to any increase in demand. The outlook indicates that any marked expansion in most lines would tend to lower prices and result in less satisfactory returns to farmers."

All crop prices except cotton showed a decline during March. Livestock prices advanced, hogs taking the lead with a 20 per cent increase. All the key products with the exception of cotton, potatoes, and butter are materially higher in price than last year. The rapid advance in grain prices through the winter is said to have left certain livestock products in relatively weak positions as to purchasing power, particularly dairy and poultry products.

WISCONSIN ADDS TO SPUD GROWTH

The striking growth of the potato industry in the United States is brought out in figures just released by the federal department of agriculture. In the years immediately following the Civil war the annual production of this crop was around 100,000,000 bushels, and we are now producing well in excess of 400,000,000 each year.

The 200,000,000 bushels mark was passed around 1900, since which time the annual production has more than doubled. Some 1,000,000 acres a year were devoted to the spud back in 1865 but the acreage is now around 4,000,000.

Leading producing States are New York, which produced 54,520,000 bushels in 1924; Minnesota 41,252,000 bushels; Maine 41,175,000 bushels; Michigan 34,252,000 bushels; Wisconsin 21,450,000 bushels; and Pennsylvania 20,792,000 bushels.

Production has more than kept pace with the increase in population, for it is shown that whereas the average per capita production during the 1860-1875 period was 2.2 bushels, the average for the 1914-1920 period was 2.7 bushels. It is shown also that the United States is the third largest producing country of the world, being exceeded only by Germany and Poland.

BADGER DAIRYMEN SAY THEY'LL RAISE MORE HAY, GRAIN

Crop Estimates Indicate How Trend Will Be—Potato Acreage Will Be Less

Wisconsin dairymen intend to strengthen their position in 1925 by raising more home grown grain and hay, and thereby avoiding expensive feed bills—according to the state and federal crop reporting service at Madison. On March 1 three thousand farmers in this state stated their planting intentions to the Wisconsin and U. S. departments of agriculture, and if the intentions are carried out the acreage of grain and hay will be larger than last year and there will be another reduction of 13 per cent in the potato acreage. Present intentions show a general expansion of the acreages both in Wisconsin and in the United States, influenced by high grain prices for the 1921 crop.

Weather and market conditions and other considerations may cause changes in the plans and intentions, but the report is compiled so that farmers may make such adjustments in their plans as they see fit.

There may be a danger in 1925 of overexpansion of the acreage in grains in states where a considerable surplus is sold for cash. In Wisconsin, however, only small amounts of grain are sold as Wisconsin farmers feed practically all the grain and hay that is raised. They are more directly interested in having enough grain and hay so that they do not have to buy feed than they are concerned with prices of cash grain. The State Department of Agriculture has previously expressed itself to the effect that the cheaper production of dairy products can be secured by raising more home grown feeds to take the place of purchased feeds but without necessarily increasing the total production of dairy products.

MORE CORN, BARLEY

A somewhat larger acreage of corn is intended this spring—more being used each year for silage and more ripe corn wanted for feeding. If the intentions are followed out, the barley acreage this spring will be 13 per cent more than last year. Many farm-

ers may grow more barley to have some early grain to finish hogs. Some of this increase may be at the expense of the acreage of oats since a reduction of 2 per cent is indicated. Oats have been cheaper than the other feed crops and there is little incentive in increasing the acreage.

New seedlings of clover and alfalfa were exceptionally good last fall, and if these seedlings come through the winter and spring in good condition the hay acreage will probably be larger than last year. A 4 per cent increase is indicated by early intentions.

INTEND TO PLANT LESS TUBERS

The effect of four years of low returns to Wisconsin potato growers—either low prices or small yields—is shown in a reduction of 13 per cent to be planted this spring. If the intentions come true, the Wisconsin acreage in 1925 will be 211,000 acres or 38 per cent below the big acreage of 1922.

The acreage of potatoes for the country as a whole is planned to be 1 per cent less than last year. This would be the lowest acreage since 1908 and slightly less than the low acreages of 1916 and 1919. With present intentions and an average yield in keeping with the recent upward trend of yields, there would be a production of 253 million bushels. This would be the smallest crop since 1921.

Tobacco growers have been somewhat discouraged by crops of poor quality and low yields for the last two years. Cigar consumption has fallen off so that the market likewise has not been particularly strong. If the intentions are carried out, there will be a reduction of 20 per cent in Wisconsin and 10 per cent in the acreage of cigar type tobacco in the United States.

FIFTH WARDERS RAP MAYOR'S WIDE CORNER PLAN

GOODLAND MIXES IN HOT DEBATE WITH TAXPAYERS

Don't Object to Pavement but They Dislike Wide Radius Street Corners

More than 200 residents of the Fifth and Third wards assembled in the Fifth ward school Monday night, to protest against the wide radius corners planned by the city council on streets to be paved under the 1925 program. Mayor John Goodland defended the big corners in a series of hot debates, in which he was opposed by the leaders of the assembly and by Aldermen Wenzel, Hassman and George Richard. All larger cities throughout the country are building corners with a wide radius on their new pavements, the mayor said, and cited Boston, Milwaukee and a number of other instances. He declared that petitions presented to the council by property owners on Cherry and Lawrence streets, through their Aldermen, indicated they were opposed to any paving. "Ninety per cent of the residents on Cherry and Lawrence streets do not want paving," he said. "That is an absolute untruth," Charles Lausman, Cherry-st. taxpayer replied. "The taxpayers want their streets paved but object to the wide corners called for in the plans adopted by the council and to the high-handed manner of the council in adopting those plans without consideration of the desires of the constituents," Mr. Lausman said. He was supported by W. H. Vanderhyden, Louis Marshall, Joseph Weber and Aldermen Wenzel, Hassman and George Richard, all of whom took the floor in opposition to the mayor. Mr. Lausman also blamed the council for not trying to secure more county aid and quoted the Post-Crescent accounts of council proceedings to bear out his statements.

RATS NEWSPAPER

This started a tirade against the press by Mayor Goodland. "The Post-Crescent never has told the truth," he said. "It can't tell the truth."

The meeting resolved itself into a hot debate between Mayor Goodland and the leaders of the assembly and taxpayers, with Aldermen Richards and Hassman supporting the latter. Both of the Aldermen advised the property owners to see for themselves how wide the curves called for in the paving plans were, by viewing the corner of Prospect-ave and Cherry-st., where the city engineer has chalked the lines on the pavement. Mayor to the citizens requested the mayor to have the radii marked out on the corner of N. Richmond and Packard-ets, so that residents of the Fifth ward might see the wide curves applied to their own streets.

After the mayor had spent several minutes in arguing for the wide corners, Mr. Vanderhyden asked whether he advised changing the corners on all streets to conform to the plan. Mr. Goodland stated that he did not, but that he favored the 40-foot radius at every intersection where new pavements are installed. He said that the added cost would be paid for the most part by the city at large. He said that in Oshkosh and some of the other larger cities of Wisconsin these wide corners are being installed with every new pavement, which shows that they are desirable.

Lions Won't Waste Paper On Governor

Useless to Ask Blaine's Cooperation for Forestry, President Coolidge Told

It would be a waste of time and paper to write Governor John J. Blaine of Wisconsin to cooperate in the national reforestation campaign this year, Appleton Lions Club voted to inform President Calvin Coolidge at their weekly luncheon in the Conway hotel Monday noon. The action was taken after a letter was read asking the club to write the governor to urge his cooperation in national forestry week from April 27 to May 3.

"Appleton Lions Club, after due deliberation, feels that it will be a waste of time and paper to ask the cooperation of Governor Blaine of Wisconsin in this movement or any other movement," the letter to President Coolidge stated.

Lions were entertained Monday noon by the arrival of a number of cubs who were seated on high chairs and forced to eat their lunch with baby spoons and tableware. Following the luncheon the cubs recited nursery rhymes under the direction of F. N. Belanger.

Fellowship Of Prayer

Daily Lenten Bible reading prepared for Federal Council of Churches of Christ in America.

Rejected by Men
Read Lk. 20:16-18. Text: 20:17. The stone which the builders rejected, the same was made the head of the corner.

MEDITATION — Each one is responsible for making fundamental choices. We cannot be both friendly and selfish, envious and generous, we must be one or the other and each one must decide for himself. A mere compromise amounts to nothing in life's great adventure. So with Jesus Christ—we must be either for or against him. Shall we reject the Saviour or make him the pattern of our lives?

"So I must make my choice. Shall I travel north or south, which of the two opposites shall I love, God or the world's evil. Whichever I choose will quench and drive out the other. And thus if I choose the love of God it will destroy every worldly passion and the river of my affections will be like the river of the water of life, clear as crystal."

PRAYER — O God our Father, we are sincerely thankful for Jesus Christ. We would choose Him and make his life our daily pattern. Fill our hearts with a great love for Christ. Let us sense the eternal significance in our daily work and in our opportunities of service to thee and all mankind. Amen.

GRAU WILL TELL WHAT IS MATTER WITH WISCONSIN

First Chamber of Commerce Speaker Here Will Visit City Again April 14

What's the Matter with Wisconsin? Phil A. Grau of Milwaukee, thinks there are a lot of things wrong with this state, especially since the last legislature convened, and he has chosen the above subject for his address at the annual meeting and fellowship dinner of Appleton Chamber of Commerce April 14 at Hotel Appleton.

Mr. Grau was asked to speak here because he was the man who addressed the chamber at its big organization meeting five years ago, a gathering historic in the life of the city. He has been invited here on several occasions but his engagements were so numerous he could not be obtained until now.

A. C. Remley, president, and Hugh G. Corbett, will present their reports of the year's work ending April 1 and the standing committees also will present brief reviews of their activities. Reservations for the dinner are to be made by Monday, April 13.

SCHOOL ESTIMATES TOO HIGH, BOARD TELLS ARCHITECT

Revise Plans and Figures, Designer Told—Elect Kimberly President

Neenah—Plans for Neenah's new high school must be altered so the cost will be within the amount of money which the school board intends to spend, the board of education notified the school architects after it studied the plans and estimates submitted at the meeting Monday evening.

Tentative plans had been submitted to the board at former meetings. The plans were returned to the architect several times and still the board is not ready to accept them.

Mr. Hedges, superintendent of schools, was instructed to communicate with the architect to urge quick action so that a report can be made at the next meeting.

Bills amounting to \$10,987.26, including salaries of teachers and janitors, were allowed, report of the school nurse was accepted.

D. L. Kimbely was elected president of the board to fill the vacancy caused by the resignation of C. B. Clark.

RECIPES

Vary Breads You Serve To Your Family

There are many white bread substitutes that make the meal more appealing and are easier to make than white bread. Here are some of the best recipes:

WHOLE WHEAT BREAD

Two cups scalded milk, four tablespoons molasses, two teaspoons salt, one compressed yeast cake, one-quarter cup lukewarm water, five cups whole wheat flour.

Add molasses and salt in milk and when cooled to lukewarm temperature add yeast cake dissolved in lukewarm water. Stir in as much flour as possible and knead in the rest. When elastic to the touch put into a well-oiled bowl and let rise, covered, until double its bulk. It will take about three hours. Form into two loaves and place in well-oiled pans. Cover and let rise until quite double its bulk. Bake one hour in a moderate oven.

RAISIN BREAD

One cup boiling water, one cup scalded milk, four tablespoons butter, two tablespoons lard, one-half cup sugar, one teaspoon salt, one egg, one-half cup seeded raisins, eight cups flour, one yeast cake.

Scald milk and cool to lukewarm temperature. Dissolve yeast cake in one-quarter cup lukewarm water. Put butter, salt, sugar and boiling water into mixing bowl and when lukewarm add cooled milk and dissolved yeast cake. Add egg well beaten and raisins. Add just enough flour to make a thin batter. Cover and let stand in a warm place until light and full of bubbles. It will take about two hours. Add remaining flour warmed in the oven to the same temperature as the "sponge." Knead on a floured board until smooth and elastic. Use more flour if necessary. Return to mixing bowl, cover and let rise in a warm place until double its bulk (about two hours). Shape into loaves (two) and put into oiled pans. Cover and let rise to double its bulk. Bake 50 minutes in a hot oven.

Bread is done when it shrinks from the pan, when it has a hollow sound if tapped with the knuckles and when the bottom of the loaf can be held on the palm of the hand without burning.

BAKING POWDER BISCUITS

Two cups white flour, four teaspoons baking powder, one teaspoon salt, two tablespoons lard, milk to make a soft dough.

Mix and sift flour, salt and baking powder. Rub in lard with tips of fingers and cut in milk with a knife. Toss on a floured board and roll with floured rolling pin to half inch thickness. Cut with a floured biscuit cutter and place close together on a buttered pan. Bake 15 minutes in a hot oven.

Two tablespoons butter can be substituted for the lard, the amount of salt reduced and water used in place of milk. Or half butter and half lard and equal amount of milk and water are used in the recipe.

The recipe makes 16 medium sized biscuits.

BRAN MUFFINS

Two eggs, one tablespoon sugar, one-half teaspoon salt, two tablespoons melted butter, one cup white flour, two cups bran, one and one-half cups milk, three teaspoons baking powder.

Beat eggs, add sugar, salt and milk. Mix and sift flour and baking powder. Add bran to first mixture, then add flour. Mix well and beat in melted butter. Turn into buttered and floured muffin pans and bake 20 minutes in a hot oven.

Whenever possible use up left-over slices of bread for breakfast toast or French toast.

Small pieces of bread and crumbs made in cutting can be used in bread crumb pancakes or bread puddings.

BREAD CRUMB PANCAKES

Two cups fine stale bread crumbs, two cups scalded milk, three tablespoons butter, two eggs, three-fourth cup flour, one-half teaspoon salt, four teaspoons baking powder.

Put crumbs and butter into mixing bowl, pour over milk and let stand until crumbs are soft. Add eggs well beaten. Mix and sift flour, baking powder and salt and add to mixture. Beat until well blended. Bake on a hot well-greased griddle and serve hot with syrup.

Morning Dresses An Asset To Wardrobe

BY CYNTHIA GREY

When are women most beautiful? "When they're out of doors, and there's no wind . . . to make their noses blue," C. R. W. Novison said the other day.

And Novison ought to know, for he's the most famous painter of beautiful women in the world today.

"When they're in evening clothes," contradicted Whitelaw, the English black-and-white artist.

"When they're young," said someone else.

And so it went. And everybody knows when women are at their worst.

That's no riddle at all. For breakfast time finds nine women out of ten looking like cartoons of themselves.

They're in their drab working clothes. They have not yet put the powder on their noses . . . or got the sleepy look out of their eyes.

No wonder that breakfast is the saddest meal of the day in most families.

Mood has a lot to do with food and the digestion of it.

Three hundred years ago Shakespeare said "Let a good laugh wait upon digestion."

And the husband who is put into a cheerful mood by the sight of a pretty, smiling wife behind the coffee-pot, is going to feel better and work better than the man who faces Gloom Personified across the breakfast table.

I think that the wife who buys the prettiest morning dresses that she can find is much wiser than the one who "wears out her old clothes around the house" . . . as most women do!

But, of course, clothes alone cannot make a woman attractive. If she is sallow and unhappy, a rose colored dress only makes her more sallow and unhappy looking.

There is an inner glow that means bright eyes, fresh color and high spirits . . . even at 7 o'clock on a foggy morning.

And the quickest way to get that glow is by a brisk bath and five minutes' hard exercise.

This may sound to you like the same old beauty hint you've been reading for the last fifteen years or so. But it's plain common sense, just the same!

For it's awfully hard to be cross when you know you are looking your best and freshest.

Louis Wilkinson, the writer, tells us about a husband whose wife was so unattractive that the sight of her took away his appetite.

"Now what are you thinking of?" she used to say as he sat silent at the breakfast table.

"And he couldn't tell her that he was thinking of bachelor flats, and envying the men who lived in them!"

Beauty has more to do with marital happiness than we sometimes give it credit for.

Men are almost pathetic in their love of beauty. They can forgive a woman's inability to cook, or to save money, or to bring up their children in the way they should go. But they can't forgive them if they become sloppy and unattractive around the house.

And many a woman who looks like a fashion plate in her street clothes makes the supreme mistake of wearing a soiled kimono and kid slippers at the breakfast table . . . for the eyes of the man whose love she hopes to keep.

Kipling once described an unhappy woman as crying over the eggs at breakfast.

At the same time he makes no mention of her looking pretty.

For to look well is to feel well, and the wise woman will save her moods and grouches for the afternoon, and bloom like a morning-glory for her husband at toast-and-grape-fruit time!

FASHION HINTS

RED WOOL DRESS

Wool kasha dresses of American beauty red come in the most tailored models and are much liked for school or office wear.

YELLOW HATS

Hats of yellow felt, bound with yellow ribbon and trimmed with a fan-shaped band or very fat bow, are very attractive with white sport frocks.

CRYSTAL FRINGE

Crystal fringe on white chiffon or crepe georgette is one of the most charming combinations it is possible to buy.

VELVET GOWN

A black velvet gown is perfectly plain save for a wide band formed of fringes of inch wide velvet ribbon.

NEWEST SKIRTS

Some of the newest skirts are 16 inches from the floor, which scarcely gives them an opportunity to do more than conceal the knee.

NOVEL TRIMMINGS

Colorful butterflies made of ribbon or silk or painted on the garment itself are novel trimmings.

FOR YOUNG GIRLS

For young girls there are very lovely soft camel's hair coats in pure white cut on sport lines.

FEATHER FRINGES

Fringes made of feathers trim entire costumes. Feathers also make flower and conventional type motifs that are used as ornaments.

LETTER FROM JOHN ALDEN

PRESCOTT TO LESLIE

PRESCOTT

Dear Leslie: Arrived here this morning all safe and sound. Went directly to the office and found that Mrs. Atherton had been a regular trooper getting things under way. I imagine that she will be able to leave for Pittsburg day after tomorrow.

The same people have been more than kind to me. The president of the company said that he had intended to arrange so that I could become a member of the firm by the first of the year. He was good enough to say that he had never had anyone in his employ that could handle men as well as I. This, of course, was very flattering to me as it is one of the things that I pride myself on.

Speaking of handling men, I am afraid I am going to have trouble with that cub Condon. You remember I told you of the impertinent way in which he spoke of you and Mrs. Atherton. It seems that he has been roped in by Mable Carter, that woman who was in the paper so much last spring when her husband was tried for murder.

Mrs. Atherton read me today parts of a letter where he asked her to take the woman under her wing when she arrived in Pittsburg.

Mrs. Atherton is quite worked up about it. Of course she declined to do anything of the sort and must have written a very snappy letter to Condon, telling him just what she thought about the matter. In return the woman wrote Mrs. Atherton a letter telling her that Condon had shown her Mrs. Atherton's refusal to have anything to do with her and that it was war to the knife from now on.

Mrs. Atherton is of the opinion that under the circumstances she ought not to go over to Pittsburg at all, but to tell her she is crazy, that I would rather fire the boy than to get along without her. She is worth much more to me in the business.

She seems to like the young chap very much. Says he was very good to both her and her husband when her husband was recovering from his blindness. She doesn't want to jeopardize his position in the plant and made me promise I would keep him on. I can see, however, she is afraid something will happen that will bring discredit upon him and much scandal perhaps to all of us.

I was for discharging him immediately but she begged me not to do so. Said Condon was most efficient in a business way. This was confirmed by your father who had told me that he had practically run the plant while he was ill.

I hate very much to have Mrs. Atherton start in alone as she will know what that shoe-doll will put the boy up to and no one knows better than I what a fool a man can make of himself when he thinks he is in love with a woman.

I did not see mother until noon. She is looking very well indeed, but that damned old maid, Priscilla Bradford, has gotten her all stirred up again.

What is it, Leslie, that makes old people's brains incapable of looking on the bright side of things? Mother told me about your letter. Said you practically told her you didn't want her to live with us. She seems to think she ought to come and live in Pittsburg. I'll talk to you about this when I arrive home.

(Copyright, 1924, NEA Service, Inc.)

TOMORROW: This letter continued.

WHY DID THEY?

Your eyes are Hazel. Your mouth is Rose. Your skin is Olive. Your laugh is Mary. You are all Grace.

Now why did they die? You have to go and christen your baby.

Solution Of Vinegar To Set Colors

When you buy cotton fabrics, particularly chambrays, percales and flannels as well, it is generally advisable to set their colors before making them up into garments, as they often lose their colors when washed for the first time.

Because of the different chemicals that are used in dyeing colors, it is, of course, impossible to form specific rules to follow in setting all colors alike. You have to experiment with several solutions, and if you have tried a salt solution and it does not prove effective, try another and keep on trying until you find one that produces the results you want. To do this, you will not want to put the whole length of goods in the solution at one time. Take a sample of the material and try the effect of the solution on it, letting it dry, and then washing it to see whether or not the color has run.

COMMON SALT HELPFUL

Any color setting substance is called a "mordant." Common salt is a very practical mordant, and in addition to being ready at hand in every household, it is a comparatively cheap mordant, and generally effective. For instance, in the cotton fabrics of the better grades, and those having rather soft, subdued colors, a salt solution is all that is usually needed to set the color. And for materials combining several colors to their designs, salt is especially desirable. That is, because most of the other mordants are effective only for a limited variety of colors while salt may be used for any. The proportion of salt to use is one cup to a gallon of cold water. The effect of the salt solution, however, is not always lasting, and sometimes it is advisable to use a different mordant.

For all shades of green an alum solution is effective. One teaspoon of alum to a gallon of water is the correct proportion to use.

VINEGAR SOLUTION

A vinegar solution is a convenient to use, and it is especially effective for pinks. In a great many cases it is the best mordant for blue as well.

To make this mordant, follow the proportion of one-half cup vinegar to a gallon of water.

Even when no reasonable doubt is justified about the fastness of the color selected, general it will pay to wash a sample before making up the goods. Then if you are still assured that the colors are practically fast, you may postpone the use of a mordant until the garment has been worn and is ready for laundering the first time. A salt solution is then all that is needed probably, and all that is necessary is to leave the garment in the solution a short time before washing it.

Novel Collar

There are many interesting touches to this frock but nothing is more novel than the collar effect which is built up from the frock, and consists of two rows of gilt embroidery. The simulated pockets make an excellent place for embroidery and the hands of fur fringe heighten the interest. Of course this is a French model, one of the very newest.

Adventures Of The Twins

Why Rabbits Can Jump

Mister Peg Leg and Nancy and Nick came to Doctor Snuffles' house and rang the bell.

Doctor Snuffles himself answered it.

"Ho, ho!" said he, rubbing his hands and looking over his specs at his visitors. "I see you've come to see about getting a new leg, sir. Well, I'm afraid I—"

The fairy peddler laughed. "That's what I'm after, Doctor Snuffles, but not in the way you mean. I want to make enough money to buy a new leg for me. This one is wearing out too soon. Everybody who buys from me helps me to get a new leg. Can I sell you something, sir?"

"You certainly can," said Doctor Snuffles. "I don't suppose many people refuse you."

"Yes, they do," said Nancy, speaking up. "Mrs. Bunny wouldn't buy a thing, just because Mister Peg Leg didn't have any Elbow Grease to help to clean her kitchen."

"Elbow Grease! Elbow Grease!" said Doctor Snuffles in a puzzled voice. "It does sound familiar. Yes, I am sure I have heard of it. It is

AN OPERATION RECOMMENDED

Avoided by Taking Lydia E. Pinkham's Vegetable Compound

Los Angeles, Cal.—"I cannot give too much praise to Lydia E. Pinkham's Vegetable Compound for what it has done for me. My mother gave it to me when I was a girl 14 years old, and since then I have taken it when I feel run down or tired. I took it for three months before my two babies were born for I suffered with my back and

had spells as if my heart was affected, and it helped me a lot. The doctors told me at one time that I would have to have an operation. I thought I would try 'Pinkham's,' as I call it, first. In two months I was all right and had no operation. I firmly believe 'Pinkham's' cured me. Every one who saw me after that remarked that I looked so well. I only have to take medicine occasionally, not but I always keep a couple of bottles by me. I recommend it to women who speak to me about their health. I have also used your Sanative Wash and like it very much."

—Mrs. E. GOTT, 4000 East Side Boulevard, Los Angeles, Cal.

Many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after operations have been advised.

Good Manners

CARD TRAY NEEDED

On the hall table in every house there should be a small silver, or other, card tray, a pad and pencil. The nicest kind of pad is one that when folded makes its own envelope, so that a message need not be left open.

Health Hints

VEGETABLES IMPORTANT

If women in their quest for beautiful complexion exercised as much care in the selection of vegetables for the table as they do in the selection of massages and face creams they would obtain more satisfactory returns.

This is the conclusion of Mrs. Mann of Anytown after studying foods for health's sake.

Many a doctor's prescription contains nothing more than the elements contained in vegetables: the housewife may buy for a few cents at the corner grocery.

These elements are phosphates, calcium and iron, the very things to clear up a muddy complexion, build up resistance in the body and make work seem easier.

There are root vegetables, such as onions, carrots, turnips, beets and parsnips. There are leafy vegetables, such as spinach, cabbage, brussels sprouts, lettuce, kale, endive, escarole, dandelion greens, beets, turnip tops and chard.

All of these are especially valuable for iron and vitamin A, and some of these should be eaten every day. Potatoes are an excellent food. In addition to mineral elements, they contain starch as well, which makes them high in energy, and one of the best and cheapest foods for children and people doing hard work.

BAN ON WALKER, DUNDEE LIFTED BY FIGHT BOARD

New York—Mickey Walker, world's welterweight champion, and Johnny Dundee, retired featherweight champion, who have been under suspension by the New York state athletic commission for some time were reinstated Tuesday.

The ban on Walker, who is expected to meet Harry Greb, middleweight title holder, in a charity bout here in June, was lifted after Walker had agreed unconditionally to meet Dave Shade, Pacific coast welterweight. It was the champion's failure to box Shade that led to his suspension last October.

GRASS FIRES DESTROY FAIR, FARM BUILDINGS

Chippewa Falls—Several fires in Chippewa county caused losses estimated at \$50,000. A brush fire resulted in the total destruction of buildings on the Percy Gillette and Melvin Sundet farms here, with a loss of about \$22,000. Early Monday flames from a grass fire destroyed three buildings on the Northern Wisconsin state fair grounds, resulting in a loss which may exceed \$25,000. Two dwelling houses and a granary were destroyed in a fire in the rural district.

FRENCH DEPUTIES PASS WOMAN SUFFRAGE BILL

Paris—The chamber of deputies Tuesday evening passed a bill giving women the right to vote in municipal elections and also making them eligible for municipal office if elected. The vote was carried by a show of hands. A similar bill was passed by the chamber in 1919 but was defeated in the senate.

ASKS RECEIVER BE NAMED FOR KLAN AT LOUISVILLE

Louisville, Ky.—A petition asking receivership for the local unit of the Knights of the Ku Klux Klan, alleging that funds had been "misappropriated, dissipated and squandered," was filed in circuit court here Tuesday by Dr. W. H. Morgan and A. J. Owens, insurance agent, recently succeeded by the state insurance commissioner.

Mr. and Mrs. George Eberhart and daughter, Mildred, and Ramon Sharp, visited friends and relatives at Oakfield Sunday.

Mrs. H. A. Gatzel returned Monday morning from California where she spent several months.

Mrs. George Eberhart attended the funeral services of Mrs. Roy Van Buron, at Seymour Monday.

AMATEURS DISPLAY SPLENDID TALENT IN DE MOLAY PLAY

"Nothing but the Truth"
Amuses Audience at Appleton Theatre

That Appleton has unlimited dramatic talent is demonstrated by the large number of amateur plays given here this season, not the least of which was "Nothing But the Truth," presented Monday night in Fischers Appleton Theatre by John F. Fose, chapter, Order of DeMolay. "Nothing But the Truth" was a farce comedy in three acts by James Montgomery and was staged and directed for the DeMolay chapter by Miss Ruth McKennan. The entire production was up to the high standard of plays directed by Miss McKennan.

The play centered about Bob Bennett, played by Eugene Cole, who promises to tell nothing but the truth for one day. The difficulties this leads him into form the plot and also provide the humor. Mr. Cole played his part splendidly.

Harry Oaks as E. M. Ralston, business partner, was excellent and with Mr. Cole and Richard Turtup as Clarence Van Dusen, John Powell as Dick Donnelly and Maurice Lewis as Bushon Dorn caused many of the laughs. The play gave the male members of the cast considerable opportunity for displaying their ability.

The feminine lead was played by Miss Dorothy Adsit, who was very charming as Gwen, Bob's sweetheart. Mrs. John Engel, Jr., played opposite Mr. Oaks in a finished manner. Miss Kathryn Pratt, Miss Louise Thompson, Miss Helen Koletzke and Miss Marjorie Davis were other members of the cast. Miss Koletzke and Miss Davis, as two chorus girls, added ginger to the plot and amused greatly with their noisy ways. The entire cast was well chosen and balanced.

Other members of the production staff were: General chairman, Cyril Agrell; publicity, F. John Harriman; tickets, Maurice Lewis; programs and advertising, Cyril Agrell; property manager, Henry Johnson.

LITTLE CHUTE RESIDENT ASKS ARREST OF HIS SON

Sheriff P. G. Schwartz is in possession of a warrant for the arrest of William Wynyard, 20, of Little Chute. The warrant was sworn out by the young man's father, Martin Wynyard, following the birth of a child to the youth's sister aged 15. Young Wynyard has disappeared and an effort is being made to trace him.

Business Getting Better, Coolidge Tells Spinners

Washington.—An assurance of increased business prosperity was voiced by President Coolidge in an address here Monday night to the National Cotton Manufacturers Association.

COOLIDGE

In the present and prospective industrial situation, Mr. Coolidge saw justification of the tariff, and he again pledged an administration of justice by the government in its relations with business. The policy of conserving to the American producer

"the right of first opportunity in the home market," he said, has resulted in a "very fair approximation of democracy in industry."

He also promised full assistance by the national government in fighting the boll weevil and endorsed the suggestion for a treaty of cooperation among the cotton producing states. The President reviewed at length the problems of the cotton manufacturing industry, noting even the return of short skirts and the consequent reduction in consumption of cloth. He added that he saw little prospect of stabilizing women's styles, and remarked that their constant changing might make it difficult for manufacturers, but "no doubt relieves monotony and adds to the spice of life."

In discussing the government's relations with business, the President declared enforcement of the law was essential but that it was necessary also for industry to exercise the same vigilance. He lauded industry for its recognition of its responsibility towards its employees.

The agencies of the government

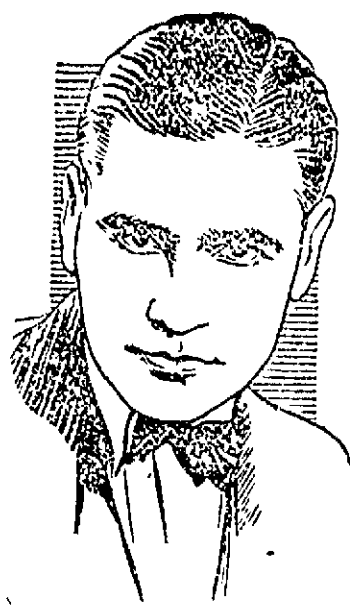

were placed at the disposal of industry by Mr. Coolidge, who mentioned specifically that the Federal Trade Board "has been devised for the purpose of safeguarding your rights, protecting you from unfair trade practices and admonishing and correcting you if you are wrong."

Justifying the tariff, the President declared "the towering stature of our industrial structure as we see it today is the best, is indeed the complete vindication of the policy."

"There has been at some times and in some quarters a disposition to criticize the American policy of conserving the first opportunity in our home market for our own producers," he said. "We can hardly expect that such a program would be popular with those who find themselves placed at a disadvantage in the greatest market of the world, which is the American market. But those who would charge us with selfishness in thus giving first thought to home interests would do well to consider whether their own policies in this regard are more liberal than ours."

DOCTORED ALL WINTER, FINDS RELIEF

"I doctored all winter and it didn't help a bit, but FOLEY'S HONEY & TAR COMPOUND was just the thing for my cough and cold," writes Mr. Henry Daniel, Berryburg, Penn. AT FISCHER'S APPLETON THEATRE
THE FRIDAY AND SATURDAY

35 BOYS TAKE PART IN INDUSTRIAL TOUR

About 35 boys attended the first of a series of industrial tours conducted by the boys' division of the Y. M. C. A. on Monday afternoon. The boys visited the Appleton Coated Paper Co. plant and Wisconsin Wire Works. Each boy took notes on the tour. Tuesday was the big day for the group when three places were visited in the afternoon. Institutions visited were the city waterworks plant, Appleton Engraving Co. and the gas plant.

THIS IS NO PLACE FOR AUTO THIEF. RECORDS PROVE

Auto Protective Association
Says Automobiles Are
Safe in Appleton

Appleton is considered one of the safest cities in the state as far as auto thefts are concerned, according to data compiled by the Automobile Protective and Information Bureau, Police department records, according to this report, show that during the first eight months of 1923 seventeen automobiles were stolen here, while that figure dwindled to six for the same period in 1924. In 1923 twenty-six stolen automobiles were recovered here and in 1924 fourteen were recovered. This indicates that Appleton police

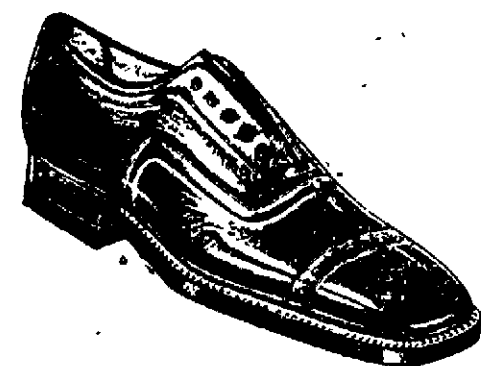

recovered a number of cars stolen in other cities.

Most of the other cities in the state show an increase in automobile thefts. In 1922 twenty-two cars were stolen in Green Bay, four in Eau Claire, four in Manitowish, sixty-eight in Superior, four hundred and five in Milwaukee, thirty-one in Janesville. During the next year 26 were stolen in Green Bay, 7 in Eau Claire, 5 in Manitowish, 7 in Superior, 622 in Milwaukee, and 29 in Janesville. In Oshkosh the number of auto thefts decreased from 13 to 7 and in Madison from 128 to 115.

The bureau says in its report: "Strict enforcement of the laws in Wisconsin makes the stealing of automobiles a hazardous undertaking and the experienced thief will not operate to any extent in that state."
